EDUCATION & LEARNING

From the First Lesson to a Future of Possibilities

EDUCATION & LEARNING

From Learning to Possibility.

Creating pathways for children and young people to learn, discover their potential, develop capabilities, and build a future with greater opportunity.

At ISLAH, we believe education should empower individuals with knowledge, confidence, skills, choices, and the ability to contribute.

Stages of Opportunity

From access to agency

**∞**

Possibilities to Grow

For every learner

**1**

Connected Ecosystem

One journey. Many futures.

**OVERVIEW**

Education is more than entering a classroom. It is about developing the ability to learn, think, create, choose and contribute.

At ISLAH, we believe that every child and young person—regardless of where they live or their economic circumstances—should have the opportunity to discover their potential and build a meaningful future.

Our Education & Learning initiatives are designed as a connected pathway—from foundational learning and academic support to higher education, career guidance, technical skills, research and knowledge creation.

We seek to move beyond access to education alone. Our aim is to create pathways of opportunity through which learners can build knowledge, confidence, skills and the ability to shape their own future.

**THE CHALLENGE**

Rural Education in India

Many rural and underserved communities continue to experience challenges that can affect educational participation, learning and future opportunities.

- ✓ Limited access to quality educational resources
- ✓ Learning gaps in foundational literacy and numeracy
- ✓ School dropout, particularly during later stages of education
- ✓ Shortages of educational and mentoring support
- ✓ Limited access to digital learning opportunities
- ✓ Gender-related barriers to continued education
- ✓ Limited exposure to career and higher-education pathways
- ✓ Inadequate access to skill-oriented and practical learning

**OUR VISION**

Education as a Pathway to Opportunity

ISLAH believes that meaningful educational development requires more than increasing access to classrooms. It requires creating an ecosystem that supports learners at different stages of their journey.

Our vision is to help create learning environments where individuals can:

Access education → Learn → Discover their potential → Receive guidance → Develop skills → Find opportunities → Build agency

OUR APPROACH

From Access to Agency

We walk with learners at every step—creating opportunities, building capability, and connecting them to a brighter future.

**01 ACCESS**

Create opportunities to enter and continue the educational journey.

**02 LEARNING**

Strengthen knowledge, understanding and academic capability.

**03 DISCOVERY**

Identify interests, abilities and potential.

**04 GUIDANCE**

Connect learners with mentors, information and informed choices.

**05 SKILLS**

Transform knowledge into practical and employable capabilities.

**06 OPPORTUNITY**

Connect learners with higher education, employment and entrepreneurship.

**07 AGENCY**

Enable individuals to make informed choices and shape their future.

OUR INITIATIVES / PROPOSALS

Eight Pathways. One Purpose.

Building a complete ecosystem that nurtures learning and opens doors to opportunity.

**01 Erwin Public School**

Building strong foundations through quality, child-centred primary education.

[Support Education →](#)[Partner With Us →](#)

Overview

Education is more than entering a classroom. It is about developing the ability to **learn, think, create, choose and contribute**.

At ISLAH, we believe that every child and young person—regardless of where they live or their economic circumstances—should have the opportunity to discover their potential and build a meaningful future.

Our **Education & Learning** initiatives are designed as a connected pathway—from foundational learning and academic support to higher education, career guidance, technical skills, research and knowledge creation.

We seek to move beyond access to education alone. Our aim is to create **pathways of opportunity** through which learners can build knowledge, confidence, skills and the ability to shape their own future.

THE CHALLENGE

Rural Education in India

Many rural and underserved communities continue to experience challenges that can affect educational participation, learning and future opportunities.

These may include:

- Limited access to quality educational resources
- Learning gaps in foundational literacy and numeracy
- School dropout, particularly during later stages of education
- Shortages of educational and mentoring support
- Limited access to digital learning opportunities
- Gender-related barriers to continued education
- Limited exposure to career and higher-education pathways
- Inadequate access to skill-oriented and practical learning

These challenges are interconnected.

A student may have access to a school but still lack learning resources. Another may have academic ability but lack guidance. A talented student may have aspirations for higher education but face financial barriers.

ISLAH seeks to address these gaps by creating pathways that connect learning with opportunity.

OUR VISION

Education as a Pathway to Opportunity

Education is one of the strongest foundations for individual development and inclusive social progress. Yet children and young people in rural and underserved communities may continue to face barriers to quality learning, educational resources, technology, guidance and opportunities for advancement.

ISLAH believes that meaningful educational development requires more than increasing access to classrooms. It requires creating an ecosystem that supports learners at different stages of their journey.

Our vision is to help create learning environments where individuals can:

Access education → Learn → Discover their potential → Receive guidance → Develop skills → Find opportunities → Build agency

OUR APPROACH

From Access to Agency

Our approach follows a simple progression:

01 — ACCESS

Create opportunities for learners to enter and continue their educational journey.

↓

02 — LEARNING

Strengthen knowledge, understanding and academic capability.

03 — DISCOVERY

Identify individual interests, abilities and potential.

04 — GUIDANCE

Connect learners with mentors, information and informed choices.

05 — SKILLS

Transform knowledge into practical and employable capabilities.

06 — OPPORTUNITY

Connect learners with higher education, employment, entrepreneurship and further learning.

07 — AGENCY

Enable individuals to make informed choices and actively shape their future.

Education & Learning — ISLAH's programme ecosystem

Area	Initiative	Core purpose
Primary Education	Primary School	Build strong foundational learning
School Support	School Kit & Learning Support (SKLS)	Remove basic resource barriers
Community Learning	Community Learning Centre (CLC)	Extend learning, values and community development
Academic Development	Academic Pathways & Talent Development (APTD)	Identify talent and strengthen academic pathways
Higher Education	Scholarships for Higher Education (SHE)	Support deserving students beyond school
Career Development	Career Guidance & Mentorship (CGM)	Help young people make informed educational and career choices
Skills	Technical & Vocational Education and Training (TVET)	Turn learning into practical capability and livelihood opportunity
Knowledge	Knowledge, Research & Publication (KRP)	Promote research, critical thinking and knowledge creation

Our Key Initiatives

01 — Primary School- EPS

Building Strong Foundations

The early years of education provide the foundation for lifelong learning.

ISLAH seeks to support children in developing:

- Foundational literacy
- Numeracy
- Curiosity and creativity
- Learning habits
- Confidence
- A positive relationship with education

Our focus is on creating supportive learning environments where children can develop the foundations they need for their educational journey.

02 — School Kit & Learning Support-SKLS

Removing Basic Barriers to Learning

For some students, the absence of basic educational materials can become an unnecessary barrier to learning.

Through **School Kit & Learning Support**, ISLAH seeks to assist students from underserved communities with essential educational materials and learning resources.

The objective is simple:

No child should be held back from learning because basic educational resources are beyond their reach.

03 — Community Learning Centres-CLC

Learning Beyond the Classroom

Community Learning Centres can provide accessible spaces where children and young people receive additional educational support.

Depending on local needs, these centres may facilitate:

- Supplementary education
- Literacy activities
- Mentoring
- Community-based learning

The objective is to bring learning opportunities closer to communities that need them most.

04 — Academic Pathways & Talent Development — APTD

Discover Potential. Strengthen Learning. Open Pathways.

In many rural and underserved communities, students have the ability and ambition to succeed, but limited access to quality academic support, competitive learning opportunities, guidance and exposure can prevent them from reaching their full potential.

ISLAH's Academic Pathways & Talent Development (APTD) initiative is designed to address this gap by combining talent identification with structured academic and examination support.

APTD brings together two complementary components: **Rural Academic Talent Search (RATS) and Coaching & Examination Support (CES)**

Our focus is not simply on examination preparation, but on helping students develop: **Conceptual understanding + Study skills + Confidence + Academic discipline**

05 — Scholarships For Higher Education-SHE

Supporting Aspiration Beyond School

For many students, the transition from school to higher education can be affected by financial and social barriers.

ISLAH seeks to support deserving students who demonstrate the ability and aspiration to pursue higher education but face genuine barriers to continuing their studies.

Support may include scholarships and other appropriate educational assistance, subject to programme eligibility and available resources.

Our goal is to help capable students continue their educational journey.

06 — Career Guidance & Mentorship - CGM

Helping Young People Make Informed Choices

Choosing a career is not simply about selecting a profession. It involves understanding one's **abilities, interests, aspirations, educational options and circumstances.**

Through **Career Guidance & Mentorship (CGM)**, ISLAH seeks to help students and young people:

- Understand different educational pathways
- Explore career possibilities
- Identify their strengths and interests
- Understand higher-education opportunities

- Connect with mentors
- Develop informed career plans
- Build confidence in decision-making

Our objective is not to tell young people **what career to choose**, but to help them understand **which pathways may be appropriate for their abilities and aspirations**.

07 — Technical & Vocational Education And Training- TVET

Turning Knowledge into Capability

Education becomes more meaningful when knowledge can be translated into practical capability.

Through **Technical & Vocational Education and Training (TVET)**, ISLAH seeks to connect learning with practical skills and future opportunities.

Potential areas may include:

- Technical skills
- Vocational training
- Digital skills
- Employability skills
- Entrepreneurship
- Industry-oriented training
- Practical and applied learning

The ultimate objective is to help learners develop capabilities that can support further education, employment, entrepreneurship and economic participation.

08 — Knowledge, Research-& Publication- KRP

Learning That Creates Knowledge

Education should not end with acquiring existing knowledge. It should also encourage **questioning, investigation, evidence and knowledge creation**.

ISLAH seeks to contribute to the wider educational ecosystem through:

- Educational resources
- Research initiatives
- Publications
- Knowledge platforms
- Academic discussions
- Interdisciplinary learning

This initiative connects education with **research, critical thinking, evidence and intellectual development**.

Learn → Explore → Excel → Advance → Skill → Connect → Contribute → Lead

Our Philosophy

We Believe Education Should Build More Than Academic Achievement

At ISLAH, meaningful education should help individuals develop:

Knowledge: The ability to understand.

Critical Thinking: The ability to question, analyse and reason.

Capability: The ability to apply what one learns.

Confidence: The courage to pursue opportunities.

Character: The responsibility to use knowledge constructively.

Creativity: The capacity to imagine new possibilities.

Contribution: The willingness to use one's capabilities for the wider good.

Expected Impact

Through its Education & Learning initiatives, ISLAH aims to contribute to:

- Improved access to educational opportunities
- Stronger foundational learning
- Greater educational continuity
- Increased access to academic guidance and mentorship
- Greater participation in higher education
- Development of technical and employability skills
- Increased confidence and informed career decision-making
- Greater educational opportunities for girls and underserved communities
- Development of capable and self-reliant communities

Empowering Communities Through Education, Learning & Opportunity

Because inclusive development begins where opportunity is needed most.

ISLAH

PRIMARY SCHOOL

Building Strong Foundations for a Lifetime of Learning

* Rename the page of Erawin Public School and rebuild this page according to mentioned below explanations.

PRIMARY SCHOOL

Erwin Public School (EPS), Darbhanga, Bihar

Building strong foundations for rural education and a brighter tomorrow.

Explore Our Programmes → Support a Learner ♥

NEED FOR SCHOOLS IN RURAL AREAS

While school enrolment in Bihar has crossed 90%, the quality of education remains a major concern. Studies indicate that only about half of primary school children achieve basic reading proficiency, highlighting a serious gap between schooling and actual learning outcomes.

In rural areas of Darbhanga, Bihar, this challenge is even more pronounced due to:

- ✗ Lack of quality primary schools and structured learning environments
- ✗ Shortage of trained teachers and modern teaching methods
- ✗ Limited access to foundational learning resources
- ✗ Low awareness among families about the importance of early education

These gaps at the primary level lead to long-term consequences such as:

- ✓ High dropout rates in later stages
- ✓ Poor transition to secondary and higher education.
- ✓ Limited employment opportunities in the future.
- ✓ Continuation of the cycle of poverty and deprivation.

OUR INITIATIVE: ERWIN PUBLIC SCHOOL (EPS)

Recognising that primary education is the foundation of lifelong learning, Islah Welfare Foundation (IWF) has established Erwin Public School (EPS) in a rural area in Darbhanga, Bihar, to address these critical gaps at the grassroots level.

The objective is to ensure that children in rural areas receive quality education at the right stage, where it matters the most. Strengthening primary education helps build strong literacy, numeracy, and life skills, which are essential for future academic and professional success.

Accessible Quality Education

Affordable for Rural Families

Safe & Nurturing Learning Environment

Building Values & Responsible Citizens

OVERVIEW OF ERWIN PUBLIC SCHOOL (EPS)

Erwin Public School (EPS) is a flagship initiative of IWF, dedicated to providing accessible, affordable, and value-based modern education in rural areas.

The school focuses on:

- ✓ Strong foundational learning (literacy and numeracy).
- ✓ Development of critical thinking and creativity.
- ✓ Student-centric and activity-based learning approach.
- ✓ Integration of moral values, ethics, and social responsibility.
- ✓ Holistic development, including confidence, leadership, and life skills.

EPS aims to serve as a model rural school, demonstrating how quality education can transform communities.

EXPECTED IMPACT

- ✓ Significant improvement in learning outcomes and academic performance
- ✓ Reduction in dropout rates at primary and secondary levels
- ✓ Strengthening of the local teaching-learning ecosystem
- ✓ Increased transition to higher education pathways
- ✓ Development of an educated, skilled, and empowered rural generation

Education Empowers
Dreams Builds
Futures

FUTURE VISION & EXPANSION

Building on the success of Erwin Public School, IWF plans to replicate this model in other underserved rural areas across India.

The long-term vision is to:

Establish quality primary schools in underserved rural regions

Create a network of model educational institutions

Ensure last-mile access to foundational education

Scale impact to reach thousands of rural children

“ Building strong foundations today—
empowering rural children through quality
primary education for a better tomorrow. ”

SUPPORT THIS INITIATIVE
Your support can change a child's future.

DONATE FOR SCHOOL DEVELOPMENT SPONSOR A CHILD'S EDUCATION

Overview

Every child deserves a beginning from which they can grow.

Primary education is more than the first stage of schooling. It is where children begin to develop the foundations of **knowledge, curiosity, confidence, discipline, creativity and social understanding** that can influence their educational journey for years to come.

At **ISLAH**, we believe that a child's place of birth or economic circumstances should not determine the quality of learning opportunities available to them.

Primary education is the foundation of lifelong learning, yet in many rural parts of India, access to quality education remains a significant challenge.

While school enrolment rates have improved, learning outcomes continue to lag. Many children are unable to achieve basic reading and numeracy skills, highlighting a critical gap between access to schooling and quality of education.

In rural area these challenges are further intensified due to:

- Lack of quality primary schools and structured learning environments
- Shortage of trained teachers and modern teaching methodologies
- Limited access to foundational learning resources
- Low awareness among families about early childhood education

☞ These gaps at the primary level often lead to long-term consequences such as high dropout rates, poor academic progression, and limited livelihood opportunities.

Through **Erawin Public School (EPS)**, ISLAH seeks to create a supportive and child-centred learning environment where children can build strong educational foundations, develop their abilities and discover the confidence to learn, question and explore.

ERAWIN PUBLIC SCHOOL — EPS

A Foundation for Learning. A Beginning for Possibility.

Erawin Public School (EPS) is an initiative of **ISLAH** focused on strengthening access to foundational and primary education for children in underserved communities.

EPS is envisioned not merely as a place where children receive classroom instruction, but as a **learning environment in which children can develop as individuals.**

Our approach seeks to bring together:

Foundational Learning

Building essential literacy, numeracy and early academic capabilities.

Curiosity & Discovery

Encouraging children to ask questions, explore ideas and develop a natural interest in learning.

Confidence & Communication

Helping children express themselves, participate actively and develop confidence in their abilities.

Creativity & Problem-Solving

Creating opportunities for children to think creatively, explore solutions and learn beyond memorisation.

Values & Social Development

Encouraging respect, responsibility, cooperation, empathy and positive relationships with others.

Health, Hygiene & Well-being

Promoting awareness and habits that support healthy and positive childhood development.

Our Educational Approach

Learning Beyond the Textbook

We believe that effective primary education should not be limited to completing a syllabus. Children need opportunities to **understand, experience, question, communicate and create**.

Accordingly, EPS seeks to encourage learning through a combination of:

- Age-appropriate classroom learning
- Foundational literacy and numeracy
- Activity-based learning
- Creative and experiential activities
- Communication and language development
- Digital and technology-enabled learning, where appropriate
- Sports and physical activities
- Art and cultural expression
- Environmental awareness
- Life skills and social learning

The objective is to help children develop **the ability and confidence to learn**, rather than simply the ability to reproduce information.

Why Primary Education Matters

The First Years Can Shape the Journey Ahead

A strong educational foundation can influence a child's ability to participate successfully in later stages of education.

When children develop foundational skills early, they are better positioned to:

Learn independently

Understand new concepts

Develop confidence

Continue their education

Discover their abilities

Pursue future opportunities

This is why ISLAH places **Primary Education** at the beginning of its broader Education & Learning pathway.

Our Commitment To Children

At EPS, our aspiration is to create an environment where children can feel:

Safe enough to ask.: Confident enough to participate.

Curious enough to explore.: Supported enough to learn.

Inspired enough to dream.: We recognise that every child is different.

Therefore, our approach seeks to respect differences in **ability, background, interests, pace of learning and individual potential**.

Community & Family Participation

Education Works Best When the Community Participates

A school cannot work in isolation from the community it serves.

ISLAH therefore seeks, wherever appropriate, to encourage constructive engagement with **parents, families, teachers, volunteers and the wider community**.

Such participation can help create a stronger connection between:

School → Family → Community → Child

The objective is to make education not merely a service delivered to a community, but a **shared investment in the community's future.**

Our Vision

ISLAH aspires to develop EPS as a **community-oriented model of primary education** that can evolve according to local needs, educational learning and available resources.

Over time, the initiative may seek to strengthen areas such as:

- Learning infrastructure
- Teacher development
- Digital learning
- Libraries and reading culture
- Science and activity-based learning
- Sports and creative activities
- Student assessment and learning support
- Parent engagement
- Scholarships and educational continuity
- Exposure and enrichment opportunities

Any expansion will be undertaken progressively, according to **available resources, educational requirements, regulatory requirements and organisational capacity.**

Expected Impact

Through Erawin Public School, ISLAH seeks to contribute to:

- **Stronger foundational learning**
- **Greater educational participation**
- **Improved confidence and communication**
- **Development of curiosity and creativity**
- **Better continuity in education**
- **Greater awareness of future opportunities**
- **Stronger engagement between school, family and community**

Ultimately, our objective is not simply to increase the number of children attending school.

We want children to develop the foundations that enable them to keep learning throughout life.

A child's future should not be limited by the circumstances of their beginning.

ISLAH

School Kit & Learning Support — SKLS

(Supporting rural students with essential learning resources)

***Rename the page of school kit distribution and remake this page according to mentioned below explanations.**

School Kit & Learning Support SKLS

Every Child. Every Classroom. Every Opportunity.

Providing essential school kits to underprivileged children for a brighter and confident future.

“ A simple school kit can change a child's journey—empowering them with confidence, dignity, and the opportunity to learn, grow, and build a better future. ”

Essential School Kits

Encouraging Education

Building Confidence & Dignity

Supporting Rural Communities

Your support today gives a child the tools to learn, grow, and succeed.

! THE CHALLENGE

In many underserved rural communities, access to education is not only limited by infrastructure but also by the lack of basic learning materials. Thousands of children—especially orphans and students from economically weaker families—are unable to afford essentials such as school bags, notebooks, uniforms, and stationery.

For poor families, these basic items often become a financial burden, leading to:

- ✗ Low school attendance and irregular participation
- ✗ Poor learning outcomes due to a lack of study materials
- ✗ Increased dropout rates at an early stage
- ✗ Loss of confidence and interest in education

Without these essential tools, children are unable to fully participate in classroom learning, which directly affects their academic progress and future opportunities.

i MORE INFO

Recognising this fundamental gap, Islah Welfare Foundation (IWF) proposes the School Kit Distribution Programme to ensure that no child is deprived of education due to lack of basic resources.

Each kit is thoughtfully designed to ensure that children can attend school with confidence, dignity, and readiness to learn. By removing these basic obstacles, the initiative directly contributes to improved enrolment, regular attendance, and sustained engagement in education.

PROGRAMME OBJECTIVE

To provide essential school kits to underprivileged students, enabling them to attend school with dignity, confidence, and readiness to learn, while promoting continued education and reducing dropout rates.

PROGRAMME APPROACH

Under Distribution of School Kits, Provision of complete, age-appropriate school kits, including:

School Bags

Notebooks & Textbooks

Pens, Pencils & Stationery

Basic Learning Materials

IMPLEMENTATION PLAN

- ✓ Identification of needy students in rural areas
- ✓ Procurement of quality school kits
- ✓ Distribution through schools and community partners
- ✓ Ensuring transparent and equitable distribution
- ✓ Regular monitoring and feedback collection

EXPECTED IMPACT

- ✓ Improved school attendance and participation
- ✓ Reduction in dropout rates among poor students
- ✓ Enhanced learning outcomes and academic performance
- ✓ Increased confidence and motivation among children
- ✓ Encouragement for families to prioritise education

WHY IT MATTERS

A simple school kit removes barriers, restores dignity, and shows a child that they are valued. It empowers them to learn with confidence and dream of a better future.

“ A simple school kit can change a child's journey—empowering them with confidence, dignity, and the opportunity to learn, grow, and build a better future. ”

SUPPORT A CHILD
Your contribution can transform a life.

DONATE FOR SCHOOL KITS
Help provide essential learning resources.

Need of School Kit & Learning Support.

For many children from economically disadvantaged and underserved communities, the cost of basic educational materials can become an unexpected barrier to regular participation in school. A notebook, school bag, stationery, drawing materials or other essential learning resources may appear simple—but for a child and family facing financial constraints, these essentials can matter greatly.

Through **School Kit & Learning Support (SLS)**, an initiative under ISLAH's **Education & Learning** programme, we seek to help reduce such barriers by supporting children with essential educational and learning materials according to identified needs and available resources.

WHAT IS School Kit & Learning Support (SKLS)?

Essential Resources for the Journey of Learning

School Kit & Learning Support (SKLS) is designed to provide need-based educational materials to children who may face difficulty accessing essential school and learning resources.

Depending on programme requirements, support may include:

- School bags
- Notebooks and writing materials
- Pens, pencils and stationery
- Drawing and creative-learning materials
- Geometry and other academic supplies
- Educational and learning resources
- Other age-appropriate school essentials

The exact contents of a school kit may vary according to **age, educational level, identified needs, available resources and programme design.**

Why It Matters

A Simple Kit Can Support a Child's Learning Journey

Educational inequality is not always created by the absence of a school.

Sometimes, it begins with something much smaller:

A child without a notebook.

A student without basic stationery.

A family unable to afford essential learning materials.

SLS seeks to address these practical barriers so that children can approach their education with greater preparedness, dignity and confidence.

Because access to education should also mean access to the basic means of learning.

Our Approach

Need-Based. Child-Centred. Responsible: SLS seeks to follow a responsible and need-based approach.

Identify: Understand the educational needs of children and communities.

Prioritise: Give appropriate attention to children facing greater barriers.

Support: Provide relevant educational materials according to programme scope and available resources.

Engage: Where appropriate, connect material support with learning, awareness and educational activities.

Follow Through: Seek to understand whether support contributes meaningfully to educational participation and continuity.

Our objective is to ensure that assistance is relevant rather than merely distributive.

Dignity In Every Kit Support Without Stigma

We believe educational assistance should be provided in a manner that respects the **dignity, privacy and individuality of every child**. Where feasible, our approach seeks to avoid creating unnecessary distinctions between children based on their economic circumstances. The purpose is not to label a child as a beneficiary. **The purpose is to help a learner participate with confidence.**

Who Can Benefit?

SLS may support children and students who meet the applicable programme criteria, particularly those facing educational-resource constraints.

Priority may be considered for:

- Children from economically vulnerable families
- Students from underserved communities
- Children with limited access to essential learning materials
- Students identified through community-based educational programmes
- Learners facing specific educational-resource barriers

Eligibility, selection and the nature of support will remain subject to the **applicable programme policy, identified needs, available resources and organisational capacity**.

What Your Support Can Do

A contribution towards SLS can help provide the practical resources that make learning easier to begin and continue.

One school bag can help a child carry the tools of learning.

A set of notebooks can create space for ideas to be recorded.

Basic stationery can enable everyday classroom participation.

Learning materials can encourage curiosity beyond the textbook.

And when many people contribute together, **small acts of support can create a larger educational opportunity.**

Our Vision

ISLAH seeks to progressively develop SLS beyond periodic distribution by exploring ways to connect **learning materials with broader educational support**.

Subject to resources and programme capacity, future components may include:

- Reading and learning resources
- Digital learning support
- Educational resource libraries
- Activity-based learning materials
- Academic support resources
- Learning assessments and follow-up
- Community learning initiatives

The emphasis will remain on **useful, need-based and responsible educational support**.

Expected Impact

- Improved school attendance and participation
- Reduction in dropout rates among poor students
- Enhanced learning outcomes and academic performance
- Increased confidence and motivation among children
- Encouragement for families to prioritise education

A simple school kit can change a child's journey—empowering them with confidence, dignity, and the opportunity to learn, grow, and build a better future."

ISLAH

COMMUNITY LEARNING CENTRE (CLC)

(Promoting Values, Knowledge, and Community Development)

***Rename this page of Community & Islamic Learning Centre and make this page like below image except some changes which is mentioned below explanations.**

COMMUNITY LEARNING CENTRE (CLC)

Building Character, Knowledge & Community Harmony

A dedicated space for moral development, community learning, and inclusive value-based education for rural youth.

**Value-Based Education**
Promoting moral values and ethics

**Community Learning**
Building knowledge and life skills

**Youth Development**
Nurturing confident and responsible youth

**Social Harmony**
Encouraging respect, compassion and unity

**NEED FOR A COMMUNITY LEARNING CENTRE**

Rural areas in India face not only challenges in access to quality formal education but also a growing gap in moral, ethical, and value-based learning. While schools focus primarily on academic development, there is limited structured space for character building, community learning, and value education, especially among children and youth.

In many villages, children and adolescents lack guidance in discipline, social responsibility, cultural values, and ethical behaviour, which are essential for building a balanced and responsible society.

This leads to:

- ✓ Lack of moral guidance and ethical understanding
- ✓ Weak social responsibility and community bonding
- ✓ Negative influences and lack of positive engagement
- ✓ Gaps in overall personality and character development

**MORE INFO**

Additionally, there is a need for basic Islamic education that is inclusive, progressive, and aligned with modern understanding, helping individuals connect with values such as honesty, compassion, respect, and community harmony.

Recognising this gap, Islah Welfare Foundation (IWF) proposes to establish a dedicated Community & Islamic Learning Centre as a separate unit, complementing but independent from formal schooling.

**PROJECT OBJECTIVE**

To create a community-based learning space that promotes moral values, ethical development, basic Islamic education, and social awareness, especially among children and youth in rural areas.

**PROJECT APPROACH**

**1 ISLAMIC & VALUE-BASED EDUCATION**

- Basic understanding of Islamic teachings and moral values
- Focus on ethics, discipline, honesty, and compassion
- Age-appropriate and inclusive learning approach

**2 COMMUNITY LEARNING & LIFE SKILLS**

- Sessions on life skills, personality development, and leadership
- Guidance on social responsibility and community engagement
- Promotion of peaceful coexistence and mutual respect

**3 YOUTH & CHILD DEVELOPMENT PROGRAMS**

- Structured learning activities for children and adolescents
- Focus on character building and confidence development
- Safe and positive environment for learning and interaction

**4 COMMUNITY ENGAGEMENT & AWARENESS**

- Regular community sessions and discussions
- Involvement of parents, elders, and local leaders
- Strengthening community bonding and social cohesion

**IMPLEMENTATION PLAN**

- ✓ Establishment of a dedicated learning centre in rural areas
- ✓ Engagement of trained educators and community facilitators
- ✓ Development of structured curriculum and activity-based sessions
- ✓ Collaboration with local communities and stakeholders
- ✓ Regular monitoring and impact assessment

**EXPECTED IMPACT**

- ✓ Strengthened moral and ethical values among youth
- ✓ Improved community harmony and social responsibility
- ✓ Development of confident, disciplined, and responsible individuals
- ✓ Enhanced community participation and engagement
- ✓ Creation of a value-driven and socially aware rural society

**FUTURE VISION**

IWF aims to scale this model across multiple rural areas across India, creating a network of Community & Islamic Learning Centres that promote:

- ✓ Holistic development (values + awareness + life skills)
- ✓ Strong community foundations
- ✓ Positive youth engagement

“Nurturing minds and building character—empowering rural communities through education, values, and collective growth.”

**SUPPORT THIS INITIATIVE**

Help us build learning centres that shape better tomorrow.

**DONATE FOR CIL CENTRE**

Your support can create a lasting impact in rural communities.

Need for a community learning centre

Rural areas in India are not only facing challenges in access to quality formal education but also a growing gap in moral, ethical, and value-based learning. While schools focus primarily on academic development, there is limited structured space for character building, community learning, and value education, especially among children and youth. In many villages, children and adolescents lack guidance in discipline, social responsibility, cultural values, and ethical behaviour, which are essential for building a balanced and responsible society.

Additionally, there is a need for basic Islamic education that is inclusive, progressive, and aligned with modern understanding, helping individuals connect with values such as honesty, compassion, respect, and community harmony.

Recognising this gap, ISLAH proposes to establish a dedicated Community Learning Centre as a separate unit, complementing but independent from formal schooling.

Our Approach

To create a community-based learning space that promotes moral values, ethical development, basic Islamic education, and social awareness, especially among children and youth in rural areas.

Project approach

1. Value-Based Education

- Basic understanding of community and moral values
- Focus on ethics, discipline, honesty, and compassion
- Age-appropriate and inclusive learning approach

2. Community Learning & Life Skills

- Sessions on life skills, personality development, and leadership
- Guidance on social responsibility and community engagement
- Promotion of peaceful coexistence and mutual respect

3. Youth & Child Development Programs

- Structured learning activities for children and adolescents
- Focus on character building and confidence development
- Safe and positive environment for learning and interaction

4. Community Engagement & Awareness

- Regular community sessions and discussions
- Involvement of parents, elders, and local leaders
- Strengthening community bonding and social cohesion

Implementation plan

- Establishment of a dedicated learning centre in rural areas
- Engagement of trained educators and community facilitators
- Development of structured curriculum and activity-based sessions
- Collaboration with local communities and stakeholders
- Regular monitoring and impact assessment

Expected Impact

- Strengthened moral and ethical values among youth
- Improved community harmony and social responsibility
- Development of confident, disciplined, and responsible individuals
- Enhanced community participation and engagement
- Creation of a value-driven and socially aware rural society

“Nurturing minds and building character—empowering rural communities through education, values, and collective growth.”

ISLAH

ACADEMIC PATHWAYS & TALENT DEVELOPMENT — APTD

Discover Potential. Strengthen Learning. Open Pathways.

*** Rename this page of Coaching Centre for Board & Competitive Exams and make this page and rebuild this page according to contents.**

In many rural and underserved communities, students have the ability and ambition to succeed, but limited access to quality academic support, competitive learning opportunities, guidance and exposure can prevent them from reaching their full potential.

ISLAH's Academic Pathways & Talent Development (APTD) initiative is designed to address this gap by combining talent identification with structured academic and examination support.

Through competitive assessment, learning support, examination preparation, recognition and academic guidance, APTD seeks to help rural students identify their strengths, build confidence and pursue higher educational opportunities.

THE NEED

For many students in rural and economically disadvantaged communities, barriers include:

- Limited access to affordable quality coaching
- Lack of structured examination preparation
- Limited exposure to competitive examinations
- Inadequate access to learning resources and academic guidance
- Few opportunities to identify and recognise academic talent
- Limited awareness of scholarships and higher-education pathways

As a result, talented students may remain unnoticed or may be unable to compete effectively for higher education and future opportunities.

OUR VISION

Creating Fairer Pathways to Academic Opportunity

To identify and nurture academic potential among rural and underserved students while providing them with the knowledge, preparation, resources and guidance needed to pursue higher educational and career opportunities.

OUR APPROACH

From Potential to Possibility APTD brings together two complementary components:

01 — Rural Academic Talent Search (RATS)

Identify Potential • Inspire Excellence • Nurture Talent

RATS seeks to identify promising students from rural communities through structured academic and aptitude-based assessments.

The programme may provide:

- Competitive academic assessments
- Recognition and certificates
- Identification of promising students
- Academic motivation and encouragement
- Mentorship and guidance opportunities
- Information about scholarships and educational pathways

02 — Coaching & Examination Support (CES)

Learn • Prepare • Perform

CES seeks to provide structured academic support to students preparing for board examinations, entrance examinations, scholarship examinations and other appropriate competitive examinations.

The programme may include:

- Concept-based academic coaching
- Examination preparation

- Study materials and learning resources
- Mock tests and assessments
- Revision and examination strategies
- Digital learning support
- Performance monitoring and academic guidance

THE ACADEMIC PATHWAY

Identify

Rural Academic Talent Search

Understand

Assessment & Academic Guidance

Strengthen

Coaching & Learning Support

Prepare

Board & Competitive Examinations

Recognise

Achievement & Potential

Progress

Higher Education & Future Opportunities

EXPECTED IMPACT

APTD aims to contribute to:

- Greater identification of academic talent in rural communities
- Improved examination preparedness and academic performance
- Increased confidence and motivation among students
- Greater awareness of scholarships and higher-education opportunities
- Improved participation in competitive examinations
- Stronger pathways towards higher education
- Reduced barriers created by lack of affordable academic support
- Development of a culture of learning, aspiration and achievement

Empowering rural students with knowledge, mentorship, guidance, and opportunity to dream bigger, achieve higher, and shape a better future.

ISLAH

Scholarships for Higher Education -SHE

(Enabling Equal Access to Education & Opportunities)

***Make this page like below image according to the mentioned below explanations.**

SCHOLARSHIPS FOR HIGHER EDUCATION

Invest in Education. Empower Futures. Transform Lives.

Supporting meritorious and financially needy students in rural areas to pursue secondary, undergraduate, and higher education with dignity and confidence.

“ Education is the most powerful tool to change lives and build a better tomorrow. ”

 Financial Support for Education

 Empowering Rural Students

 Building Careers, Creating Futures

 Equal Opportunity for All

 Education Today, Better Tomorrow

Your support today can scholar a student and change generations.

THE CHALLENGE

In rural regions, access to education does not end at school enrollment—the real challenge begins after primary education. Many children are forced to drop out after Class 8 or 10 due to financial hardship.

- ✗ Inability to afford school/college fees, books, and travel expenses
- ✗ Economic pressure to support family income
- ✗ Lack of access to higher education institutions nearby
- ✗ Absence of guidance and motivation for career pathways

This leads to a serious issue where potential remains untapped, resulting in:

- ✗ High dropout rates at secondary and higher education levels
- ✗ Limited employment and livelihood opportunities
- ✗ Continuation of the cycle of poverty across generations.

MORE INFO

To address this critical gap, Islah Welfare Foundation (IWF) proposes a Scholarship Programme aimed at supporting meritorious and financially needy students to pursue secondary, undergraduate, and higher education.

This initiative is designed to remove financial barriers and enable deserving students to continue their academic journey with dignity and confidence. Beyond financial assistance, the program also focuses on nurturing students through mentorship, academic guidance, and career support, ensuring long-term success.

PROGRAMME OBJECTIVE

To ensure that no deserving student in rural areas is deprived of education due to financial constraints, by providing scholarships and holistic academic support for secondary and higher education.

PROGRAMME APPROACH

1 FINANCIAL SUPPORT

- Scholarships for secondary, undergraduate, and higher education
- Coverage of fees, books, study materials, and essential expenses

2 ACADEMIC SUPPORT

- Mentorship and academic guidance
- Regular counseling and performance tracking
- Support for exam preparation and skill development

3 CAREER GUIDANCE

- Career counseling and pathway planning
- Exposure to higher education and career opportunities
- Building confidence and leadership skills

4 COMMUNITY OUTREACH

- Identifying deserving students in rural communities
- Engaging with parents, teachers, and local leaders
- Promoting the importance of education and aspirations

IMPLEMENTATION PLAN

- Identification of deserving students
- Establishment of scholarship selection criteria
- Engagement of donors & CSR partners
- Disbursement of scholarships & support
- Regular monitoring, evaluation and impact assessment

EXPECTED IMPACT

- Promote equal access to education for marginalised communities
- Reduce dropout rates at critical stages of education
- Encourage academic excellence and higher education participation
- Develop future leaders and skilled professionals
- Contribute to inclusive and sustainable social development

WHY IT MATTERS

The scholarship programme offers CSR partners an opportunity to invest in human capital development, creating a ripple effect of empowerment, economic upliftment, and community transformation.

“ Supporting dreams, removing barriers—ensuring every rural child gets a fair chance to learn, grow, and succeed. ”

 **SUPPORT A STUDENT**
Your contribution can transform a life.

 **BECOME A PARTNER**
Partner with us to build brighter futures.

Need of Scholarships for Higher Education

In rural regions, access to education does not end at school enrollment—the real challenge begins after primary education. While many children start schooling, a large number are forced to drop out after Class 8 or 10 due to financial hardship.

- Inability to afford school/college fees, books, and travel expenses
- Economic pressure to support family income
- Lack of access to higher education institutions nearby
- Absence of guidance and motivation for career pathways

This leads to a serious issue where potential remains untapped, resulting in:

- High dropout rates at secondary and higher education levels
- Limited employment and livelihood opportunities
- Continuation of the cycle of poverty across generations.

To address this critical gap, ISLAH proposes a Scholarship Programme aimed at supporting meritorious and financially needy students to pursue secondary, undergraduate, and higher education

This initiative is designed to remove financial barriers and enable deserving students to continue their academic journey with dignity and confidence. Beyond financial assistance, the program also focuses on nurturing students through mentorship, academic guidance, and career support, ensuring long-term success.

Programme Objective

To ensure that no deserving student in rural areas is deprived of education due to financial constraints, by providing scholarships and holistic academic support for secondary and higher education.

Programme Approach

Financial Support

- Scholarships for secondary, undergraduate, and higher education
- Coverage of fees, books, study materials, and essential expenses

Expected Impact:

- Promote equal access to education for marginalised communities
- Reduce dropout rates at critical stages of education
- Encourage academic excellence and higher education participation
- Develop future leaders and skilled professionals
- Contribute to inclusive and sustainable social development

The scholarship programme offers CSR partners an opportunity to invest in human capital development, creating a ripple effect of empowerment, economic upliftment, and community transformation.

Career Guidance & Mentorship (CGM)

(Guiding rural students towards better educational & career opportunities)

***Rename this page and make this page like below image according to the mentioned below explanations.**

CAREER GUIDANCE & MENTORSHIP (CGM)

Guiding Rural Students Towards Better Educational & Career Opportunities.

Providing accurate career information, academic direction, and mentorship support to help rural students make informed decisions and build a successful future.

RIGHT GUIDANCE
BRIGHTER FUTURE

EXPLORE PLAN PREPARE SUCCEED

Right guidance at the right time can transform a student's future.

Expert Career Counselling

Academic Guidance

Higher Education Support

Competitive Exam Preparation

Mentorship & Life Skills

Building Successful Futures

THE CHALLENGE

Rural students face multiple barriers that prevent them from making informed career and academic decisions:

- ✗ Lack of awareness about career options and emerging fields
- ✗ Limited knowledge of courses, colleges, and entrance exams
- ✗ Absence of mentorship and expert guidance
- ✗ Dependence on misinformation or peer influence
- ✗ Inability to afford private counselling services

Due to these challenges, many students make uninformed career choices, leading to:

- ✗ Mismatch between education and career opportunities
- ✗ Low transition to higher education
- ✗ Increased unemployment or underemployment
- ✗ Continuation of the cycle of poverty

MORE INFO

Recognising this critical gap, Islah Welfare Foundation (IWF) proposes the Career Counselling & Academic Guidance Programme (CTAG) as a structured initiative to guide and support rural students.

This programme connects students with expert counsellors, educators, and mentors, providing personalised career guidance, academic support, and awareness about opportunities. It empowers students to make the right choices and build a confident and successful future.

WE HELP STUDENTS:

- Discover Their Strengths
- Explore Career Options
- Plan the Right Path
- Achieve Their Goals

PROGRAMME OBJECTIVE

To provide accurate career information, academic direction, and mentorship support to rural students, enabling them to make informed decisions about their education and future careers.

PROGRAMME APPROACH

CAREER COUNSELLING SESSIONS

- Career counselling sessions in schools and community centres
- One-to-one and group counselling for students and parents

ACADEMIC SUPPORT & TRAINING

- Academic training workshops and subject-specific support
- Improving learning skills and academic performance

COMPETITIVE EXAM & HIGHER EDUCATION GUIDANCE

- Guidance for competitive exams and higher education admissions
- Information on courses, colleges, scholarships and opportunities

MENTORSHIP & LIFE SKILLS

- Training of career counsellors and local mentors
- Integration of life skills, communication, and personality development

DIGITAL AWARENESS & SUPPORT

- Awareness about online platforms, applications, and resources
- Guidance on admissions, form filling, and documentation

EXPECTED IMPACT

Identification of hidden talent in rural areas

Improved academic motivation and performance

Increased transition to higher education and professional courses

Better alignment between student interests and career pathways

Increased participation in competitive exams and skill programs

“Enabling rural students to make the right choices—turning aspirations into clear, achievable career pathways.”

SUPPORT THIS INITIATIVE

Your contribution can guide and transform young lives.

BECOME A MENTOR

Share your knowledge. Shape a brighter future.

Need of Career Guidance & Mentorship (CGM)

Rural India is home to a vast pool of talented and capable students, but due to lack of exposure, guidance, and recognition, their potential often remains unidentified and underdeveloped.

Key challenges faced by rural students include:

- Lack of awareness about career options and emerging fields
- Limited knowledge of courses, colleges, and entrance exams
- Absence of mentorship and expert guidance
- Dependence on misinformation or peer influence
- Inability to afford private counselling services

Due to these challenges, many students make uninformed career choices, leading to:

- Mismatch between education and career opportunities
- Low transition to higher education
- Increased unemployment or underemployment
- Continuation of the cycle of poverty

Recognising this critical gap, ISLAH proposes the Career Guidance & Mentorship (CGM) Programme as a structured initiative to guide and support rural students.

Programme Objective

To provide accurate career information, academic direction, and mentorship support to rural students, enabling them to make informed decisions about their education and future careers.

Programme Approach

- Career counselling sessions in schools and community centres
- Academic training workshops and subject-specific support
- Guidance for competitive exams and higher education admissions
- Training of career counsellors and local mentors
- Integration of life skills, communication, and personality development
- Awareness about online platforms, applications, and resources
- Guidance on admissions, form filling, and documentation

Expected Impact

- Increased transition rate to higher education and professional courses
- Improved academic performance and reduced confusion in subject selection
- Development of a network of trained career counsellors at the district level
- Better alignment between student interests and career pathways
- Increased participation in competitive exams and skill programs.

“Enabling rural students to make the right choices—turning aspirations into clear, achievable career pathways.”

TECHNICAL & VOCATIONAL EDUCATION AND TRAINING- TVET

Building practical capabilities that help people work, earn, create and grow.

***Need to rename the page of Technical Institute and make this page according to mentioned below explanations.**

TECHNICAL & VOCATIONAL EDUCATION AND TRAINING – TVET

Building practical capabilities that help people work, earn, create and grow.

Formal education can provide knowledge, but meaningful economic opportunity often also requires practical skills, relevant training, confidence and access to livelihood pathways.

Through Technical & Vocational Education and Training (TVET), an initiative under ISLAH's Education & Learning programme, we bridge the gap between learning and livelihood by creating opportunities for practical, employment-oriented and entrepreneurship-focused skill development.

**Learn**
Build Knowledge

**Practise**
Gain Practical Skills

**Qualify**
Get Certified

**Connect**
Access Opportunities

**Earn & Grow**
Build a Better Future

WHY TVET?

Education Should Create Capability as well as Knowledge

-  Many young people complete basic education but lack practical skills for suitable employment.
-  Women have ability and motivation to earn but lack access to training, tools, markets or guidance.
-  Rural communities have capable people but limited opportunities to develop and apply capabilities locally.

Our objective is not simply to provide training. It is to create pathways from skills to opportunity.

TVET CREATES PATHWAYS

WHAT IS TVET?

A Practical Pathway to Economic Opportunity

ISLAH's TVET initiative is an integrated platform combining technical education, vocational training, practical learning, employability development and livelihood support. Depending on local needs, resources and programme capacity, TVET may include:

TECHNICAL SKILLS

Practical training in areas such as:

- ▶ Electrical work
- ▶ Computer applications
- ▶ Basic mechanical and repair skills
- ▶ Digital and technology-related skills
- ▶ Other locally relevant technical trades

VOCATIONAL SKILLS

Training in livelihood-oriented areas such as:

- ▶ Tailoring and garment making
- ▶ Beauty and wellness
- ▶ Handicrafts
- ▶ Small-scale production
- ▶ Digital services
- ▶ Other demand-based vocational activities

The specific courses will be determined according to local opportunity, market demand, learner interests, available infrastructure and implementation capacity.

OUR TVET APPROACH

Learn. Practise. Qualify. Connect. Earn. Grow.

**01 SKILL IDENTIFICATION**
We identify local opportunities and skills that are relevant to communities.

**02 PRACTICAL TRAINING**
Hands-on learning to build real skills and practical competence.

**03 INDUSTRY & MARKET ORIENTATION**
Exposure to employers, businesses and markets to keep skills relevant.

**04 SOFT SKILLS & EMPLOYABILITY**
Building communication, workplace behaviour, digital literacy, problem-solving and more.

**05 ASSESSMENT & CERTIFICATION**
Assessment and certification as per applicable training framework.

**06 LIVELIHOOD & PLACEMENT SUPPORT**
Connecting learners with jobs, businesses, markets and self-employment support.

THE IMPACT WE SEEK

**Improved Employability**

**Self-Employment & Entrepreneurship**

**Better Income & Economic Stability**

**Women Empowerment & Participation**

**Skilled Workforce for Local Development**

**Stronger Communities & Economic Resilience**

**Skills today. Opportunities tomorrow.**
Together, let's build a self-reliant and empowered community.

Partner With Us

Need of Technical & Vocational Education and Training (TVET)

Formal education can provide knowledge, but meaningful economic opportunity often also requires **practical skills, relevant training, confidence and access to livelihood pathways**. For many young people and women in rural and underserved communities, opportunities to acquire market-relevant technical and vocational skills remain limited. Distance from training institutions, financial constraints, inadequate information about career pathways and limited exposure to employers or markets can restrict their ability to convert their potential into sustainable livelihoods.

Through **Technical & Vocational Education and Training (TVET)**, an initiative under ISLAH's **Education & Learning** programme, we seek to bridge the gap between **learning and livelihood** by creating opportunities for practical, employment-oriented and entrepreneurship-focused skill development.

WHY NEED OF TVET

Education Should Create Capability as Well as Knowledge

A young person may complete basic education yet remain unable to access suitable employment because they lack practical skills.

A woman may have the ability and motivation to earn but lack access to training, tools, markets or guidance.

A rural community may have capable people but limited opportunities to develop and apply their capabilities locally.

TVET seeks to address this gap by connecting:

Learning

↓

Practical Skills

↓

Capability

↓

Employment / Self-Employment

↓

Income

↓

Economic Resilience

Our objective is not simply to provide training. It is to create pathways from skills to opportunity.

WHAT IS TVET?

A Practical Pathway to Economic Opportunity

ISLAH's TVET is **proposed initiative** as an integrated platform combining **technical education, vocational training, practical learning, employability development and livelihood support**.

Depending on local needs, resources and programme capacity, TVET may include:

Technical Skills

Practical training in areas such as:

- Electrical work
- Computer applications
- Basic mechanical and repair skills
- Digital and technology-related skills
- Other locally relevant technical trades

Vocational Skills

Training in livelihood-oriented areas such as:

- Tailoring and garment making
- Beauty and wellness
- Handicrafts
- Small-scale production
- Digital services
- Other demand-based vocational activities

The specific courses will be determined according to **local opportunity, market demand, learner interests, available infrastructure and implementation capacity**.

OUR VISION

ISLAH aspires to develop **community-oriented TVET models** that respond to changing economic realities and the evolving needs of rural and underserved populations.

Over time, subject to resources, partnerships, regulatory requirements and organisational capacity, TVET may evolve through:

- Dedicated technical training facilities
- Vocational training centres
- Digital skill laboratories
- Industry and employer partnerships
- Apprenticeship and practical exposure opportunities
- Entrepreneurship support
- Women-focused livelihood programmes
- Local enterprise development
- Career and placement networks
- Recognition and certification pathways

We seek to develop models that are **practical, adaptable, market-aware and capable of creating measurable opportunity**.

OUR APPROACH

Learn. Practise. Qualify. Connect. Earn. Grow.

01 — SKILL IDENTIFICATION

We seek to understand local employment and livelihood opportunities and identify skills that may have practical relevance to the communities we serve.

02 — PRACTICAL TRAINING

Training is intended to emphasise **hands-on learning**, allowing participants to develop practical competence rather than relying solely on theoretical instruction.

03 — INDUSTRY & MARKET ORIENTATION

Where feasible, training may incorporate exposure to employers, businesses, professionals and local markets so that skills remain connected to real-world requirements.

04 — SOFT SKILLS & EMPLOYABILITY

Technical capability is strengthened through relevant areas such as:

- Communication
- Workplace behaviour
- Digital literacy
- Problem-solving
- Basic financial awareness
- Professional readiness

05 — ASSESSMENT & CERTIFICATION

Where appropriate and feasible, learners may undergo assessment and receive certificates or other recognised documentation in accordance with the applicable training framework.

06 — LIVELIHOOD & PLACEMENT SUPPORT

Where feasible, TVET may facilitate connections with:

- Employers
- Local businesses
- Service providers
- Markets
- Self-employment opportunities
- Entrepreneurship support systems

EXPECTED IMPACT

From Skill Development to Economic Resilience: ISLAH expects TVET to contribute, where programmes are effectively implemented, to:

Improved employability: Participants develop practical and market-relevant skills.

Greater self-employment opportunities: Skilled individuals can explore independent livelihood pathways.

Improved income potential: Skills may provide access to better-quality employment or enterprise opportunities.

Women's economic participation: Training can support women seeking greater economic independence.

Youth capability: Young people gain practical skills alongside formal education.

Local skilled workforce: Communities develop a stronger pool of technically and vocationally capable people.

Entrepreneurship development: Some participants may progress from skills to micro-enterprise.

Better employment quality: Participants may have opportunities to transition from unskilled or low-skilled work towards more skilled employment.

Greater economic resilience: Individuals and households can potentially diversify their livelihood opportunities.

Education should not only prepare young people for examinations—it should also prepare them for employment, entrepreneurship, and independent livelihoods.

ISLAH

Knowledge, Research & Publication– KRP

(Promoting intellectual depth, academic rigour and rational inquiry across disciplines.)

***Need to rename of JISNS page and rebuild this page according to contents as below:**

KNOWLEDGE & RESEARCH

Making Knowledge Accessible.
Encouraging Learning, Supporting Better Understanding.

At ISLAH, we believe that knowledge has the power to transform lives and communities. Through libraries, learning programmes, research and documentation, we create opportunities for people to read, learn, question, explore and share knowledge.

Read
Access to knowledge

Learn
Build skills & understanding

Research
Discover & analyse

Share
Exchange ideas & experiences

Apply
Create better opportunities

WHY KNOWLEDGE & RESEARCH

Education Should Create a Culture of Learning

A student may attend school but still have limited access to books, reference materials or a quiet place to study.

A young person may have the ability to learn but lack access to digital resources, career information or wider educational opportunities.

A rural community may have valuable experiences, traditions and local knowledge that remain undocumented or inaccessible to others.

Knowledge & Research seeks to address these gaps by connecting:

Our objective is not simply to provide books or information. It is to create pathways that help people learn, think and make better use of knowledge.

WHAT IS KNOWLEDGE & RESEARCH?

A Community-Based Pathway to Learning and Understanding

ISLAH's Knowledge & Research is a proposed initiative designed to bring together libraries, reading programmes, digital learning, student resources, research, documentation and knowledge-sharing activities for rural and underserved communities.

Rural Public Library
Development of accessible community libraries providing:

- Books and reading materials
- Newspapers and magazines
- Reference resources
- Educational materials
- Children's reading resources
- Study spaces
- Community learning activities

Digital Knowledge & Learning
Depending on available resources, this initiative may provide:

- Basic computer access
- Digital literacy
- Internet-enabled learning
- Online educational resources
- Digital study materials
- Access to useful information and services

Research & Community Studies
Encouraging research and studies on areas such as:

- Rural education
- Youth development
- Livelihoods
- Women and communities
- Environment
- Social development
- Access to opportunities
- Local development challenges

Youth Research & Learning
Encouraging rural youth to develop skills

- Observation
- Research
- Critical thinking
- Writing
- Data collection
- Analysis
- Community understanding

OUR VISION

Building Rural Communities Through Knowledge

ISLAH aspires to develop community-oriented knowledge and learning models that respond to the educational and information needs of rural and underserved communities.

Over time, Knowledge & Research may evolve through:

- Rural public libraries
- Community learning spaces
- Digital knowledge centres
- Student resource centres
- Mobile library and outreach services
- Reading and learning programmes
- Community research
- Knowledge documentation
- Youth research opportunities
- Knowledge-sharing platforms
- Research reports and knowledge resources

We seek to develop models that are accessible, practical, community-oriented and sustainable.

OUR APPROACH

Read. Learn. Question. Research. Share. Apply.

01

ACCESS TO KNOWLEDGE
We seek to bring books, learning materials, digital resources and useful information closer to rural communities.

02

READING & LEARNING
We encourage children, students and community members to develop regular reading and self-learning habits.

03

DIGITAL ACCESS
Where feasible, we seek to provide access to computers, digital resources and basic digital learning opportunities.

04

RESEARCH & UNDERSTANDING
We encourage people to ask questions, study issues and develop a better understanding of rural communities and their challenges.

05

KNOWLEDGE SHARING
Knowledge becomes more valuable when it is shared. We aim to make useful learning and research accessible to students, communities and wider audiences.

EXPECTED IMPACT

From Access to Knowledge to Greater Opportunity

Improved access to learning resources
Children and students gain greater access to books, study materials and educational resources.

Stronger reading culture
Regular reading activities may encourage children and young people to develop lasting reading habits.

Better learning opportunities
Community-based learning spaces can support learning beyond the classroom.

Improved digital awareness
Rural communities may gain greater familiarity with digital tools and online learning resources.

Greater access to information
Students and community members can access useful educational, career and public information.

Stronger research culture
Young people may develop curiosity, research skills and critical thinking.

Preservation of community knowledge
Valuable local experiences and knowledge can be documented for future learning.

Better informed communities
Access to reliable information can support greater awareness and informed decision-making.

Stronger community learning spaces
Libraries and knowledge centres can become places where people learn, discuss and participate together.

OUR LONG-TERM DIRECTION

ISLAH envisions developing a network of Rural Knowledge & Learning Centres that may bring together:

Library

Reading

Digital Learning

Student Resources

Research

Community Knowledge

“ Knowledge is a powerful foundation for understanding society, addressing complex challenges and creating meaningful possibilities for the future. ”

Be a Part of Their Journey

Your support today can open doors to learning, confidence and a better tomorrow.

Volunteer / Mentor

Knowledge, Research & Publication- KRP

Making Knowledge Accessible. Encouraging Learning. Supporting Better Understanding.

Overview

Education provides the foundation for learning, but meaningful development also requires **access to information, books, learning resources, research opportunities and spaces for independent learning.**

For many children, students and young people in rural and underserved communities, access to libraries, quality reading materials, digital resources and reliable information remains limited. Distance, financial constraints, inadequate infrastructure and limited access to learning spaces can restrict opportunities to learn beyond the classroom.

Through **Knowledge & Research**, an initiative under ISLAH's **Education & Learning** program, we seek to improve access to knowledge and create opportunities for **reading, learning, research, critical thinking and community understanding.**

Our aim is not simply to provide information. It is to create **accessible spaces and pathways where people can read, learn, question, explore and share knowledge.**

Why Knowledge, Research & Publication- KRP

Education Should Create a Culture of Learning

A student may attend school but still have limited access to books, reference materials or a quiet place to study.

A young person may have the ability to learn but lack access to digital resources, career information or wider educational opportunities.

A rural community may have valuable experiences, traditions and local knowledge that remain undocumented or inaccessible to others.

Knowledge & Research seeks to address these gaps by connecting:

Access to Knowledge

↓

Reading & Learning

↓

Questioning & Exploration

↓

Research & Understanding

↓

Knowledge Sharing

↓

Better Opportunities & Informed Action

Our objective is not simply to provide books or information. It is to create pathways that help people learn, think and make better use of knowledge.

What Is Knowledge & Research?

A Community-Based Pathway to Learning and Understanding

ISLAH's **Knowledge & Research** is a **proposed initiative** designed to bring together **libraries, reading programmes, digital learning, student resources, research, documentation and knowledge-sharing activities** for rural and underserved communities. Depending on local needs, resources and programme capacity, Knowledge & Research may include:

Rural Public Library

Development of accessible community libraries providing:

- Books and reading materials
- Newspapers and magazines
- Reference resources
- Educational materials

- Children's reading resources
- Study spaces
- Community learning activities

The library is envisioned not simply as a place for books, but as a **community space for learning, information and engagement**. Rural library models in India have increasingly combined books with digital resources, learning activities and wider community services.

Reading & Learning Programme

Activities designed to encourage regular reading and independent learning, such as:

- Reading sessions
- Reading clubs
- Storytelling
- Group discussions
- Book-based activities
- Learning sessions
- Children's reading activities

The objective is to help develop a **lasting culture of reading and learning**.

Digital Knowledge & Learning

Access to technology can expand learning opportunities beyond the physical library.

Depending on available resources, this initiative may provide:

- Basic computer access
- Digital literacy
- Internet-enabled learning
- Online educational resources
- Digital study materials
- Access to useful information and services

Public libraries can also serve as trusted community spaces for digital literacy and access to information, particularly in rural areas.

Research & Community Studies

Understanding rural communities requires listening to their experiences and studying the challenges they face.

ISLAH seeks to encourage research and community studies relating to areas such as:

- Rural education
- Youth development
- Livelihoods
- Women and communities
- Environment
- Social development
- Access to opportunities
- Local development challenges

Research findings may help strengthen awareness, programme planning and evidence-based community initiatives.

Youth Research & Learning

Young people should have opportunities not only to receive knowledge but also to **ask questions and explore issues around them**.

ISLAH may encourage rural youth to develop skills in:

- Observation
- Research
- Critical thinking
- Writing

- Data collection
- Analysis
- Community understanding

Over time, this initiative may create opportunities for **youth-led research and community studies**.

Our Vision

Building Rural Communities Through Knowledge

ISLAH aspires to develop **community-oriented knowledge and learning models** that respond to the educational and information needs of rural and underserved communities. Over time, subject to resources, partnerships and organisational capacity, Knowledge & Research may evolve through:

- Rural public libraries
- Community learning spaces
- Digital knowledge centres
- Student resource centres
- Mobile library and outreach services
- Reading and learning programmes
- Community research
- Knowledge documentation
- Youth research opportunities
- Knowledge-sharing platforms
- Research reports and knowledge resources

We seek to develop models that are **accessible, practical, community-oriented and sustainable**.

Our Approach

Read. Learn. Question. Research. Share. Apply.

01 — ACCESS TO KNOWLEDGE

We seek to bring books, learning materials, digital resources and useful information closer to rural communities.

02 — READING & LEARNING

We encourage children, students and community members to develop regular reading and self-learning habits.

03 — DIGITAL ACCESS

Where feasible, we seek to provide access to computers, digital resources and basic digital learning opportunities.

04 — RESEARCH & UNDERSTANDING

We encourage people to ask questions, study issues and develop a better understanding of rural communities and their challenges.

05 — KNOWLEDGE SHARING

Knowledge becomes more valuable when it is shared. We aim to make useful learning and research accessible to students, communities and wider audiences.

Expected Impact

From Access to Knowledge to Greater Opportunity

ISLAH expects Knowledge & Research to contribute, where programmes are effectively implemented, to:

Improved access to learning resources: Children and students gain greater access to books, study materials and educational resources.

Stronger reading culture: Regular reading activities may encourage children and young people to develop lasting reading habits.

Better learning opportunities: Community-based learning spaces can support learning beyond the classroom.

Improved digital awareness: Rural communities may gain greater familiarity with digital tools and online learning resources.

Greater access to information: Students and community members can access useful educational, career and public information.

Stronger research culture: Young people may develop curiosity, research skills and critical thinking.

Preservation of community knowledge: Valuable local experiences and knowledge can be documented for future learning.

Better informed communities: Access to reliable information can support greater awareness and informed decision-making.

Stronger community learning spaces: Libraries and knowledge centres can become places where people learn, discuss and participate together.

Knowledge For Rural Communities

Knowledge should not remain limited to classrooms, institutions or urban centres.

A rural child should have the opportunity to discover books.

A student should have access to a place where they can study.

A young person should be able to access information about education and opportunities.

A community should have a space where people can **read, learn, discuss and exchange ideas**.

This is the purpose of ISLAH's **Knowledge & Research** initiative.

Our Long-Term Direction

ISLAH envisions developing a network of **Rural Knowledge & Learning Centres** that may bring together:

Library

Reading

Digital Learning

Student Resources

Research

Community Knowledge

Knowledge Sharing

The model can be adapted according to the needs, resources and realities of each community.

Our Commitment

Knowledge Creates Possibility

Education should not end when the school day ends. Learning should not depend only on a classroom and access to knowledge should not be limited by geography.

ISLAH believes that every community deserves opportunities to read, learn, question and explore.

Through Knowledge & Research, we seek to bring knowledge closer to rural communities and create spaces where learning can continue throughout life.
