

HEALTHCARE & WELLNESS

Accessible Healthcare. Healthier Communities.

We are committed to improving healthcare access in rural and underserved communities through preventive care, awareness, medical support and emergency services.

Accessible Healthcare

Preventive Care

Emergency Support

Community Wellness

Better Health

Stronger Communities

Empowered Lives

Brighter Tomorrow

OVERVIEW

Health is one of the most critical pillars of human development, yet it remains a major challenge in rural India. IWF bridges this gap by providing affordable, accessible and quality healthcare support to underserved populations.

MORE INFO →

WHY HEALTHCARE INTERVENTION IS NEEDED

- ✓ Limited availability of healthcare facilities and doctors
- ✓ Shortage of qualified medical staff in rural areas
- ✓ High cost of treatment makes healthcare unaffordable
- ✓ Lack of awareness leads to late diagnosis
- ✓ Seasonal challenges like floods disrupt healthcare access
- ✓ Dependence on untrained practitioners increases health risks
- ✓ Without timely intervention, minor issues become serious

IWF'S HEALTHCARE APPROACH

- ✓ Providing subsidised or free healthcare services
- ✓ Promoting preventive healthcare and awareness
- ✓ Improving access to basic and emergency care
- ✓ Supporting health camps, screenings & outreach programs
- ✓ Assisting patients in critical & emergency situations
- ✓ Building sustainable rural healthcare infrastructure

OUR KEY HEALTHCARE INITIATIVES

1 Critical Life & Emergency Support

2 Medical Aid to Poor Patients

3 Menstrual Hygiene Support Programme

4 Medical Health Check-up Camps

5 Cervical Cancer Prevention & Awareness

6 Diabetes Prevention & Awareness Programme

7 Establishment of Health Care Centre

8 Rural Ambulance Service

OUR HEALTH SERVICES

- 1 General Health Check-ups
- 2 Mother & Child Healthcare
- 3 Women's Health & Wellness
- 4 Preventive Care & Screenings
- 5 Health Awareness Programs
- 6 Referral & Follow-up Support

EXPECTED IMPACT

Improved access to quality healthcare

Reduction in disease burden & preventable illness

Timely medical intervention & reduced risks

Increased health awareness & behaviour change

Better quality of life in rural communities

“ Ensuring healthcare reaches the last mile—because no life should be lost due to lack of access to timely medical care. ”

HEALTHY TODAY, STRONGER TOMORROW

Your support can bring hope, heal lives and build healthier communities.

SUPPORT OUR HEALTHCARE INITIATIVES

BECOME A VOLUNTEER

Overview

Health is one of the most critical pillars of human development, yet it continues to remain a major challenge in rural India. The relationship between health and poverty is deeply interconnected—poor health reduces earning capacity, while poverty limits access to proper healthcare, creating a continuous cycle of deprivation and vulnerability.

In recent years, the rising cost and commercialisation of healthcare services have made quality medical treatment increasingly unaffordable for economically weaker communities, particularly in rural areas. As a result, millions of people are unable to access timely diagnosis, preventive healthcare, emergency medical support, and essential treatment services.

Women, children, elderly persons, and economically disadvantaged families are among the most affected due to limited healthcare infrastructure, lack of awareness, and financial constraints.

Recognising these challenges, Islah Welfare Foundation (ISLAH) is committed to improving healthcare access and promoting community wellness in underserved rural areas through affordable, accessible, preventive, and awareness-based healthcare initiatives.

Our approach goes beyond treatment support—it focuses on building healthier communities through preventive healthcare, awareness, early intervention, emergency assistance, and sustainable healthcare access.

Why Healthcare Intervention is Needed in Rural Areas

Rural communities continue to face significantly greater healthcare challenges compared to urban regions due to systemic gaps in infrastructure, awareness, and service delivery.

The need for focused healthcare intervention in rural areas arises because:

- Limited availability of healthcare facilities forces people to travel long distances
- Shortage of qualified doctors, specialists, and medical staff
- High cost of treatment makes healthcare unaffordable for poor families
- Lack of awareness leads to delayed diagnosis and preventable diseases
- Seasonal disasters such as floods further disrupt healthcare access
- Dependence on untrained or informal practitioners increases health risks
- Limited emergency medical transportation and ambulance support
- Poor awareness regarding hygiene, nutrition, women's health, and preventive care

Without timely medical intervention, minor illnesses often escalate into serious and life-threatening conditions, leading to increased financial hardship and reduced quality of life for rural families.

Our Approach

To address these critical gaps, Islah Welfare Foundation (ISLAH) aims to develop community-focused healthcare solutions that are affordable, accessible, preventive, and sustainable.

The foundation focuses on:

- Providing subsidised or free healthcare support to poor and vulnerable communities
- Promoting preventive healthcare and health awareness initiatives
- Improving access to basic and emergency medical services
- Organising health check-up camps, screenings, and outreach programmes
- Supporting critical life and emergency medical assistance
- Promoting women's health, menstrual hygiene, and community wellness
- Conducting awareness programmes on diseases such as diabetes, cervical cancer, and lifestyle-related illnesses
- Strengthening healthcare accessibility in underserved rural areas through community-based interventions

Our proposed initiatives

1. Critical Life & Emergency Support -CLES* **Rename of the page of critical life & emergency support initiative**
2. Rural Ambulance & Emergency Response – RAER ***Rearrange the sequence of the page**
3. Medical Assistance for Poor Patients- MAP - *** Rename of the page of Medical Aid programme for poor patients**

4. Community Health Check-up Camps – CHC
5. Diabetes Prevention & Lifestyle Awareness- DPLA *Rearrange the sequence of the page
6. Menstrual Health & Hygiene Support – MHHS * Rename of the page of Menstrual Hygiene Support Programme and rearrange sequence of the page
7. Cervical Cancer Prevention & Awareness -CCPA *Rearrange the sequence of the page
8. Rural Healthcare & Wellness Centres- RHCW *Rearrange the sequence of the page

Emergency → Access → Medical Assistance → Screening → Prevention → Women's Health → Cancer Prevention → Long-term Rural Health Infrastructure

Expected Impact

Through its healthcare and wellness initiatives, ISLAH aims to create measurable and sustainable impact in rural communities, including:

- Improved access to affordable and preventive healthcare services
- Reduction in disease burden and preventable illnesses
- Timely medical intervention and reduced health-related risks
- Increased healthcare awareness and behavioural change
- Improved maternal, women, and community health outcomes
- Enhanced access to emergency medical support in rural areas
- Improved overall quality of life and community well-being

Our Vision

ISLAH envisions a future where no individual is deprived of healthcare due to poverty, distance, or lack of awareness. The foundation aims to strengthen rural healthcare systems and ensure that quality healthcare reaches even the most underserved communities.

“Ensuring healthcare reaches the last mile—because no life should be lost due to lack of access to timely medical care.”

HOPE / SUPPORT / SUSTAINABLE CHANGE

HOW WE WORK

From Need to Support — A Transparent, Compassionate & Accountable Process

1**NEED IDENTIFIED**
Patient or family requests urgent support or case is referred through a trusted source or partner.

2**CASE INTAKE**
Collect basic patient, hospital and treatment information.

3**VERIFICATION**
IWF field team verifies admission, medical reports, financial vulnerability and supporting documents.

4**NEED ASSESSMENT**
Assess urgency, treatment requirement and eligible support.

5**SUPPORT DECISION**
Case reviewed/approved according to IWF programme and available resources.

6**DONOR & RESOURCE MOBILISATION**
Individual donors, monthly donors, CSR partners and humanitarian networks are engaged.

7**DIRECT SUPPORT**
Funds/support are routed directly to hospital/pharmacy or appropriate provider wherever feasible, with receipts and documentation.

8**MONITORING & CLOSURE**
Follow case progress, track utilisation, maintain records and publish/report case utilisation after closure.

 **TIMELY CARE**

 **TRANSPARENT USE OF FUNDS**

 **ACCOUNTABILITY**

 **DIGNITY & HOPE**

Every case is verified.
Every contribution is tracked.
Every patient deserves dignity.

Overview

For economically weaker families, a medical emergency often becomes a fight for survival. In many cases, critically ill patients admitted to hospitals are unable to receive timely treatment due to lack of financial resources, emergency medical support, or immediate assistance required during life-threatening situations.

In rural and underserved communities, poor families frequently struggle to arrange:

- Emergency hospital expenses
- ICU and critical care support
- Medicines and urgent diagnostic tests
- Blood requirements and emergency procedures
- Transportation and ambulance services
- Immediate financial assistance during hospitalisation

As a result, many underprivileged patients face delays in treatment at the most critical moments, putting their lives at serious risk.

Recognising this urgent humanitarian need, Islah Welfare Foundation (ISLAH) proposes the Critical Life & Emergency Support Initiative to provide emergency assistance and life-saving support to poor and vulnerable patients admitted to hospitals in critical condition.

The initiative aims to ensure that no individual is denied emergency medical care due to poverty or financial hardship.

Initiative Objective

To provide timely emergency support and humanitarian medical assistance to underprivileged patients admitted to hospitals in critical condition, helping them access immediate treatment and life-saving care.

Our Support Areas

1. Emergency Financial Assistance

- Support for urgent medical expenses during hospitalisation
- Assistance for poor patients requiring immediate treatment
- Financial aid for critical and emergency healthcare needs

2. Critical Care & Hospital Support

- Support for ICU, emergency ward, and life-saving treatment requirements
- Assistance for medicines, injections, oxygen, and emergency diagnostics
- Coordination with hospitals and healthcare providers for urgent care

3. Emergency Medicines & Diagnostic Support

- Assistance for costly medicines and emergency medical consumables
- Support for urgent blood tests, scans, and diagnostic procedures
- Help for patients requiring immediate medical intervention

4. Support for Economically Weaker Families

- Priority assistance for poor, vulnerable, and marginalised patients
- Humanitarian support during sudden medical crises
- Compassionate assistance for families facing financial distress during emergencies

Implementation Approach

The initiative will be implemented through:

- Coordination with hospitals, doctors, and healthcare providers
- Emergency response and rapid support mechanisms
- Identification and verification of genuinely needy patients
- Community donations, CSR partnerships, and humanitarian support networks
- Transparent monitoring and documentation of assistance provided

Expected Impact

Through this initiative, ISLAH aims to:

- Save lives through timely emergency intervention
- Support poor families during critical medical situations
- Reduce delays in life-saving treatment due to financial constraints
- Improve access to emergency healthcare support in underserved communities

- Provide dignity, compassion, and hope to vulnerable patients and families

Our Vision

ISLAH believes that every life is valuable and that no patient should suffer or lose access to treatment due to poverty during a medical emergency.

“Standing with vulnerable patients in their most critical moments—because timely support can save lives.”

PATIENT STORY

The Human Behind the Case

Mohammed Salim, 62, is a daily wage labourer from Darbhanga district who was brought to Patna Medical College & Hospital in a critical state after struggling to breathe for several days. His family, unable to afford even a rickshaw to the hospital, borrowed money from neighbours to bring him to Patna.

Doctors diagnosed him with severe bilateral pneumonia leading to respiratory failure. He was immediately placed on ventilator support in the ICU. His wife and two children are back in the village, with no source of income while he is hospitalised. The family has exhausted their savings of just ₹3,000.

IWF's field team verified his case within 24 hours of admission and has been coordinating with the hospital. Every rupee donated goes directly to his treatment. With your support, Mohammed Salim can survive this crisis and return to his family.

FAMILY BACKGROUND

Wife (homemaker), one son (18, daily labourer), one daughter (16, studying in Class 10). The family earns approximately ₹250-300 per day on good days. They have no health insurance or government coverage.

Fundraising for Critical Medical Treatment Policy

Effective Date: 01/04/2026

1. Purpose:

Islah Welfare Foundation conducts fundraising campaigns to provide financial assistance for individuals requiring critical medical treatment who are unable to meet the cost of their medical care. This policy explains how funds collected through individual medical fundraising campaigns are managed, utilised, and accounted for, ensuring transparency, fairness, and responsible stewardship of donor contributions.

2. Individual Medical Fundraising Campaigns:

Each fundraising campaign is launched based on information and supporting medical documents provided by the beneficiary or their authorised representative. The campaign specifies an **estimated treatment cost**, which serves as the fundraising target. Actual treatment expenses may vary depending on the patient's medical condition, hospital requirements, and treatment progress.

3. Administrative & Fund Management Cost:

To support the planning, verification, fundraising, campaign management, payment processing, documentation, compliance, monitoring, communication, and overall administration of medical fundraising activities, **"20% of the total funds raised may be utilised towards administrative, campaign management, compliance, verification, payment processing, monitoring, and program management expenses incurred in operating the medical fundraising program. The actual percentage applied may vary depending on the circumstances of each campaign."**

4. Where Total Funds Collected Are Less Than the Estimated Treatment Cost:

If the total amount raised for an individual beneficiary is **less than the estimated treatment cost**:

- Islah Welfare Foundation may allocate **up to 20% of the total amount collected** towards administrative and program management expenses.
- The remaining amount will be utilised exclusively towards the beneficiary's eligible medical treatment and related approved medical expenses.
- Donors acknowledge that, in such cases, the total amount collected may not be sufficient to fully meet the beneficiary's treatment requirements.

5. Where Total Funds Collected Exceed the Required Treatment Cost:

If the total amount collected exceeds the amount reasonably required for the beneficiary's eligible medical treatment:

1. The beneficiary's verified medical expenses shall be paid first.
2. Administrative and program management costs, as provided under this policy, may be retained by IWF.
3. Any remaining surplus amount shall **not** be refunded to individual donors.
4. The surplus shall be transferred to **Health & Well-Being Surplus Fund** and utilised for:
 - Critical medical treatment assistance
 - Emergency healthcare support
 - Medical aid for economically weaker patients
 - Health camps and community healthcare initiatives
 - Other healthcare programs consistent with the charitable objectives of Islah Welfare Foundation

6. Change in Treatment Circumstances:

If any of the following occurs:

- Treatment is completed at a lower cost;
- Treatment is discontinued;
- The beneficiary no longer requires assistance;
- The beneficiary becomes ineligible;
- The beneficiary unfortunately passes away before full utilisation of the funds;

- The hospital or medical provider refuses or returns payment;

Then, after settling all verified eligible medical expenses and applicable administrative costs, any remaining balance may be transferred to the **Health & Well-Being Surplus Fund** for use in supporting other eligible medical beneficiaries and healthcare initiatives.

7. Payment of Medical Assistance:

Wherever reasonably possible, payments shall be made directly to:

- Hospitals
- Medical institutions
- Pharmacies
- Diagnostic centres
- Other authorised healthcare providers

Direct payment to beneficiaries may be made only where appropriate documentation and verification are available.

8. Verification: Islah Welfare Foundation reserves the right to:

- Verify medical documents.
- Verify beneficiary identity.
- Obtain treatment updates.
- Seek additional supporting documents.
- Suspend or discontinue fundraising if false, misleading, or fraudulent information is discovered.

9. Donor Consent: By donating, donors acknowledge and agree that:

- Donations are voluntary and irrevocable.
- Donations support charitable medical assistance programs.
- Funds will be managed in accordance with this policy.
- Treatment costs are estimates and may increase or decrease.
- Surplus funds may be transferred to the IWF Medical Assistance Fund as described in this policy.
- Donations are generally non-refundable except where required by law or in cases of duplicate or erroneous transactions.

10. Transparency: Islah Welfare Foundation is committed to maintaining proper records of:

- Funds received
- Medical disbursements
- Administrative allocations
- Surplus transfers
- Program utilisation

These records shall be maintained in accordance with applicable laws and internal governance procedures.

11. Right to Amend: Islah Welfare Foundation reserves the right to amend this policy at any time to comply with applicable laws, regulatory requirements, and organisational needs.

12. Contact Us: Islah Welfare Foundation

RURAL AMBULANCE & EMERGENCY RESPONSE

Reaching every life in time—because emergency care should never be delayed by distance or poverty.

OVERVIEW

In rural and remote areas, timely access to emergency medical transportation remains a major challenge. Delays in reaching hospitals during emergencies can put lives at serious risk, especially for economically weaker families.

Rural communities frequently face:

- ✓ Lack of nearby ambulance and emergency transport services
- ✓ Delays in reaching hospitals during critical situations
- ✓ Poor road connectivity and transportation infrastructure
- ✓ High cost of private ambulance services
- ✓ Increased risks during accidents, emergencies, and maternal health cases
- ✓ Limited emergency response support in remote areas

Recognising this urgent healthcare need, Islam Welfare Foundation (IWF) proposes the Rural Ambulance & Emergency Response Service to provide accessible, affordable, and timely emergency medical transportation and response support to rural and underserved communities.

The initiative aims to ensure that no life is lost due to delayed access to emergency healthcare services.

PROJECT OBJECTIVE

To provide timely ambulance and emergency response support for rural and economically weaker communities, ensuring rapid access to healthcare facilities during medical emergencies and critical situations.

PROJECT APPROACH

1

EMERGENCY AMBULANCE SERVICES

- Ambulance support for critical patients and medical emergencies
- Transportation to hospitals and healthcare centres
- Emergency referral services for serious health conditions
- Support during accidents, trauma, and life-threatening situations

2

MATERNAL & CHILD EMERGENCY SUPPORT

- Emergency transportation for pregnant women and newborn care cases
- Assistance during childbirth-related emergencies
- Improved access to maternal healthcare facilities

3

RURAL EMERGENCY RESPONSE SYSTEM

- Quick-response healthcare support during emergencies
- Coordination with hospitals, doctors, and healthcare providers
- Community-based emergency communication and support mechanisms

4

AFFORDABLE & ACCESSIBLE HEALTHCARE TRANSPORT

- Low-cost or subsidised ambulance services for poor families
- Priority support for economically weaker and vulnerable patients
- Healthcare transportation support for remote and underserved villages

5

COMMUNITY AWARENESS & PREPAREDNESS

- Awareness programmes on emergency response and first aid
- Community sensitisation regarding emergency healthcare access
- Promotion of timely medical intervention during emergencies

IMPLEMENTATION PLAN

- ✓ Deployment of ambulance and emergency response vehicles in rural areas
- ✓ Coordination with hospitals, healthcare institutions, and emergency networks
- ✓ Engagement of trained drivers, healthcare staff, and volunteers
- ✓ Establishment of emergency response and communication systems
- ✓ CSR partnerships and community healthcare support initiatives
- ✓ Continuous monitoring and emergency service evaluation

EXPECTED IMPACT

- ✓ Reduce delays in emergency medical transportation
- ✓ Improve survival and recovery rates during critical situations
- ✓ Strengthen emergency healthcare access in rural communities
- ✓ Support poor families during medical emergencies
- ✓ Improve maternal and child emergency healthcare outcomes
- ✓ Save lives through timely and reliable ambulance support

OUR VISION

IWF believes that timely emergency response can save lives, and every individual deserves quick access to healthcare support during critical moments, regardless of location or financial condition.

Together, we can reach every life in time.
Join our mission and support rural communities by enabling timely emergency care and saving lives.

Overview

In rural and remote areas, timely access to emergency medical transportation remains a major challenge. During medical emergencies, accidents, pregnancy complications, serious illnesses, or critical health conditions, many patients are unable to reach hospitals on time due to lack of ambulance services, poor transportation facilities, and financial constraints.

For economically weaker families, arranging emergency transportation often becomes difficult, resulting in dangerous delays in medical treatment. In many villages, patients are transported using unsafe or unsuitable means, putting lives at even greater risk.

Rural communities frequently face:

- Lack of nearby ambulance and emergency transport services
- Delays in reaching hospitals during critical situations
- Poor road connectivity and transportation infrastructure
- High cost of private ambulance services
- Increased risks during accidents, emergencies, and maternal health cases
- Limited emergency response support in remote areas

As a result, many preventable deaths and complications occur simply because patients are unable to access timely medical transportation and emergency care.

Recognising this urgent healthcare need, Islah Welfare Foundation (ISLAH) proposes the **Rural Ambulance & Emergency Response Service** to provide accessible, affordable, and timely emergency medical transportation and response support to rural and underserved communities. The initiative aims to ensure that no life is lost due to delayed access to emergency healthcare services.

Project Objective

To provide timely ambulance and emergency response support for rural and economically weaker communities, ensuring rapid access to healthcare facilities during medical emergencies and critical situations.

Project Approach

1. Emergency Ambulance Services

- Ambulance support for critical patients and medical emergencies
- Transportation of patients to hospitals and healthcare centres
- Emergency referral services for serious health conditions
- Support during accidents, trauma, and life-threatening situations

2. Maternal & Child Emergency Support

- Emergency transportation for pregnant women and newborn care cases
- Assistance during childbirth-related emergencies
- Improved access to maternal healthcare facilities in rural areas

3. Rural Emergency Response System

- Quick-response healthcare support during emergencies
- Coordination with hospitals, doctors, and healthcare providers
- Community-based emergency communication and support mechanisms

4. Affordable & Accessible Healthcare Transport

- Low-cost or subsidised ambulance services for poor families
- Priority support for economically weaker and vulnerable patients
- Healthcare transportation support for remote and underserved villages

5. Community Awareness & Preparedness

- Awareness programmes on emergency response and first aid
- Community sensitisation regarding emergency healthcare access
- Promotion of timely medical intervention during emergencies

Implementation Plan

The initiative will be implemented through:

- Deployment of ambulance and emergency response vehicles in rural areas
- Coordination with hospitals, healthcare institutions, and emergency networks

- Engagement of trained drivers, healthcare staff, and volunteers
- Establishment of emergency response and communication systems
- CSR partnerships and community healthcare support initiatives
- Continuous monitoring and emergency service evaluation

Expected Impact

Through this initiative, ISLAH aims to:

- Reduce delays in emergency medical transportation
- Improve survival and recovery rates during critical situations
- Strengthen emergency healthcare access in rural communities
- Support poor families during medical emergencies
- Improve maternal and child emergency healthcare outcomes
- Save lives through timely and reliable ambulance support

Our Vision

ISLAH believes that timely emergency response can save lives, and every individual deserves quick access to healthcare support during critical moments, regardless of location or financial condition.

“Reaching every life in time—because emergency care should never be delayed by distance or poverty.”

ISLAH

Medical Assistance for Poor Patients (MAP)

MEDICAL Assistance FOR POOR PATIENTS

Extending care and compassion to those who need it most—because every life deserves access to treatment and hope.

Your support can bring treatment, hope and a second chance at life.

OVERVIEW

Access to quality healthcare remains a major challenge for economically weaker families, especially in rural and underserved communities. For many poor patients, even basic medical treatment becomes financially unaffordable due to rising healthcare costs, expensive medicines, diagnostic tests, and hospital expenses.

Patients are often forced to delay or discontinue treatment because their families cannot arrange the required funds. This situation becomes more critical during serious illnesses, surgeries, long-term treatments, and hospitalisation.

Poor families often struggle with:

- 1 Hospital admission and treatment expenses
- 2 Costly medicines and diagnostic tests
- 3 Expenses related to surgeries and specialised treatment
- 4 Financial burden during prolonged illness
- 5 Lack of access to affordable healthcare support
- 6 Dependence on loans or distress financing for treatment

As a result, many patients suffer from delayed treatment, worsening health conditions, financial hardship, and loss of dignity.

Recognising this urgent humanitarian need, Islah Welfare Foundation (IWF) proposes the Medical Aid Programme for Poor Patients to provide financial assistance and healthcare support to economically disadvantaged individuals who are unable to afford medical treatment expenses.

The programme aims to ensure that no patient is deprived of essential healthcare due to financial constraints.

PROGRAMME OBJECTIVE

To provide financial assistance and humanitarian healthcare support to poor and underprivileged patients for medical treatment, medicines, diagnostics, and hospital-related expenses.

PROGRAMME APPROACH

1

FINANCIAL ASSISTANCE FOR TREATMENT

- Support for hospitalisation and medical treatment expenses
- Assistance for surgeries and specialised medical care
- Financial aid for economically weaker patients

2

SUPPORT FOR MEDICINES & DIAGNOSTICS

- Assistance for costly medicines and medical consumables
- Support for diagnostic tests, scans, and laboratory investigations
- Help for patients requiring long-term medication support

3

SUPPORT FOR RURAL & UNDERSERVED COMMUNITIES

- Healthcare assistance for patients from rural and marginalised areas
- Identification and verification of genuinely needy beneficiaries
- Outreach support through hospitals, community networks, and volunteers

IMPLEMENTATION APPROACH

- ✓ Coordination with hospitals, doctors, and healthcare institutions
- ✓ Verification and assessment of needy patients
- ✓ Community donations, CSR partnerships, and humanitarian support
- ✓ Transparent documentation and utilisation of funds
- ✓ Continuous monitoring of patient support and treatment assistance

EXPECTED IMPACT

- ✓ Improve access to healthcare for poor patients
- ✓ Reduce financial burden on economically weaker families
- ✓ Ensure timely medical treatment and healthcare support
- ✓ Prevent treatment discontinuation due to lack of funds
- ✓ Restore hope, dignity, and well-being among vulnerable patients

OUR VISION

IWF believes that healthcare is a basic human necessity, and no individual should suffer or lose access to treatment due to poverty.

You can be the reason for someone's second chance at life.
Join our mission and help poor patients receive the treatment they deserve.

- Verification and assessment of needy patients
- Community donations, CSR partnerships, and humanitarian support
- Transparent documentation and utilisation of funds
- Continuous monitoring of patient support and treatment assistance

Expected Impact

Through this programme, ISLAH aims to:

- Improve access to healthcare for poor patients
- Reduce financial burden on economically weaker families
- Ensure timely medical treatment and healthcare support
- Prevent treatment discontinuation due to lack of funds
- Restore hope, dignity, and well-being among vulnerable patients

Our Vision

ISLAH believes that healthcare is a basic human necessity, and no individual should suffer or lose access to treatment due to poverty.

“Extending care and compassion to those who need it most—because every life deserves access to treatment and hope.”

ISLAH

Community Health Check-up Camps (CHC)

COMMUNITY HEALTH CHECK-UP

Taking healthcare to the community—because early care and awareness can save lives and build healthier futures.

OVERVIEW

Access to basic healthcare and preventive medical services remains a major challenge in rural and underserved communities. Many people are unable to undergo regular health check-ups due to lack of facilities, financial limitations, poor awareness, and shortage of medical professionals.

As a result, common illnesses and health conditions often remain undiagnosed until they become serious. Preventable diseases, malnutrition, anaemia, diabetes, hypertension, infections, and other health issues continue to affect vulnerable populations.

In rural communities, people often face:

- Limited access to doctors and healthcare facilities
- Lack of awareness regarding preventive healthcare
- Inability to afford regular medical check-ups
- Delayed diagnosis of diseases and chronic conditions
- Poor maternal, child, and elderly healthcare support
- Dependence on untrained or informal healthcare providers

Recognising this critical healthcare gap, Islah Welfare Foundation (IWF) proposes the Medical Health Check-up Camp Programme to provide accessible, affordable, and community-based preventive healthcare services to underserved populations.

The programme aims to bring healthcare directly to communities through organised medical camps, screenings, awareness sessions, and support.

PROGRAMME OBJECTIVE

To improve access to preventive healthcare and early disease detection by organising medical health check-up camps for poor and underserved communities, especially in rural areas.

PROGRAMME APPROACH

1

GENERAL HEALTH CHECK-UP CAMPS

- Free or subsidised medical consultation and basic treatment
- General health screening for children, women, adults, and senior citizens
- Basic health assessment and medical advice by qualified doctors

2

DIAGNOSTIC & PREVENTIVE SCREENING

- Screening for diabetes, blood pressure, anaemia, and other common diseases
- Basic diagnostic tests and health monitoring
- Early identification and referral of serious health conditions

3

WOMEN & CHILD HEALTHCARE SUPPORT

- Health check-ups for women, adolescent girls, and children
- Awareness on nutrition, maternal health, hygiene, and preventive care
- Support for anaemia and menstrual health awareness

4

HEALTH AWARENESS & COMMUNITY EDUCATION

- Awareness on hygiene, sanitation, nutrition, and healthy lifestyle
- Education on disease prevention and early medical intervention
- Community engagement to promote preventive healthcare practices

5

REFERRAL & FOLLOW-UP SUPPORT

- Referral support for patients requiring advanced treatment
- Coordination with hospitals and healthcare institutions
- Guidance for further medical care and treatment access

IMPLEMENTATION APPROACH

- Organising regular health camps in rural and underserved areas
- Collaboration with doctors, hospitals, healthcare professionals, and volunteers
- Mobile outreach and community-based healthcare activities
- CSR partnerships and humanitarian healthcare initiatives
- Monitoring and documentation of camp outcomes and patient support

EXPECTED IMPACT

- Improve access to healthcare services in underserved communities
- Promote early diagnosis and preventive healthcare
- Reduce disease burden and untreated health conditions
- Increase health awareness and healthy practices among communities
- Improve the overall health and well-being of vulnerable populations

OUR VISION

IWF believes that preventive healthcare and early medical support are essential for building healthier and stronger communities, and no individual should be deprived of basic healthcare services due to poverty or lack of access.

You can be the reason for someone's health and well-being.

Join our mission and help bring healthcare, hope, and healing to underserved communities.

Overview

Access to basic healthcare and preventive medical services remains a major challenge in rural and underserved communities. Many people, especially from economically weaker sections, are unable to undergo regular health check-ups due to a lack of nearby healthcare facilities, financial limitations, poor awareness, and a shortage of medical professionals.

As a result, common illnesses and health conditions often remain undiagnosed until they become serious or life-threatening. Preventable diseases, malnutrition, anaemia, diabetes, hypertension, infections, and other health issues continue to affect vulnerable populations due to delayed detection and lack of timely medical attention.

In rural communities, people often face:

- Limited access to doctors and healthcare facilities
- Lack of awareness regarding preventive healthcare
- Inability to afford regular medical check-ups
- Delayed diagnosis of diseases and chronic conditions
- Poor maternal, child, and elderly healthcare support
- Dependence on untrained or informal healthcare providers

Recognising this critical healthcare gap, Islah Welfare Foundation (ISLAH) proposes the Medical Health Check-up Camp Programme to provide accessible, affordable, and community-based preventive healthcare services to underserved populations.

The programme aims to bring healthcare directly to communities through organised medical camps, screenings, awareness sessions, and basic treatment support.

Programme Objective

To improve access to preventive healthcare and early disease detection by organising medical health check-up camps for poor and underserved communities, especially in rural areas.

Programme Approach

1. General Health Check-up Camps

- Free or subsidised medical consultation and basic treatment
- General health screening for children, women, adults, and senior citizens
- Basic health assessment and medical advice by qualified doctors

2. Diagnostic & Preventive Screening

- Screening for diabetes, blood pressure, anaemia, and other common diseases
- Basic diagnostic tests and health monitoring
- Early identification and referral of serious health conditions

3. Women & Child Healthcare Support

- Health check-ups for women, adolescent girls, and children
- Awareness on nutrition, maternal health, hygiene, and preventive care
- Support for anaemia and menstrual health awareness

4. Health Awareness & Community Education

- Awareness sessions on hygiene, sanitation, nutrition, and healthy lifestyle
- Education on disease prevention and early medical intervention
- Community engagement to promote preventive healthcare practices

5. Referral & Follow-up Support

- Referral support for patients requiring advanced treatment
- Coordination with hospitals and healthcare institutions
- Guidance for further medical care and treatment access

Implementation Approach

The programme will be implemented through:

- Organising regular health camps in rural and underserved areas
- Collaboration with doctors, hospitals, healthcare professionals, and volunteers
- Mobile outreach and community-based healthcare activities
- CSR partnerships and humanitarian healthcare initiatives
- Monitoring and documentation of camp outcomes and patient support

Expected Impact

Through this programme, ISLAH aims to:

- Improve access to healthcare services in underserved communities
- Promote early diagnosis and preventive healthcare
- Reduce disease burden and untreated health conditions
- Increase health awareness and healthy practices among communities
- Improve the overall health and well-being of vulnerable populations

Our Vision

ISLAH believes that preventive healthcare and early medical support are essential for building healthier and stronger communities, and no individual should be deprived of basic healthcare services due to poverty or lack of access.

“Taking healthcare to the community—because early care and awareness can save lives and build healthier futures.”

ISLAH

Diabetes Prevention & Lifestyle Awareness (DPLA)

DIABETES PREVENTION & LIFESTYLE AWARENESS

Promoting healthy lifestyles and preventive care—because awareness today can prevent disease tomorrow.

OVERVIEW

Diabetes is a growing lifestyle disease affecting millions. Lack of awareness, unhealthy habits, poor diet, physical inactivity, stress, and delayed diagnosis increase health risks. In rural areas, limited healthcare access and low awareness lead to late diagnosis and serious complications.

Economically weaker families frequently face:

- ✓ Lack of awareness about diabetes prevention and healthy lifestyle
- ✓ Limited access to regular health check-ups and screening
- ✓ Inability to afford continuous treatment and medicines
- ✓ Poor nutritional awareness and unhealthy food habits
- ✓ Delayed diagnosis and untreated health conditions
- ✓ Increased risk of complications due to lack of monitoring and care

Recognising this public health concern, Islah Welfare Foundation (IWF) proposes the Diabetes Prevention & Lifestyle Awareness Programme to promote awareness, early detection, and healthy living among rural and underserved communities.

The programme aims to educate communities about diabetes prevention and encourage healthier living to reduce the burden of lifestyle diseases.

PROGRAMME OBJECTIVE

To create awareness about diabetes prevention, promote healthy lifestyle practices, and encourage early screening and preventive healthcare among rural and economically weaker communities.

PROGRAMME APPROACH

1

DIABETES AWARENESS & HEALTH EDUCATION

- Awareness campaigns on causes, symptoms, and complications
- Education on preventive healthcare and healthy lifestyle habits
- Community sessions on nutrition, physical activity, and stress management

2

FREE HEALTH SCREENING & CHECK-UP CAMPS

- Blood sugar testing and diabetes screening camps
- Basic health check-ups for early identification of high-risk individuals
- Monitoring support for diabetic and pre-diabetic individuals

3

LIFESTYLE & NUTRITION GUIDANCE

- Guidance on healthy eating habits and balanced diet
- Promotion of physical fitness, yoga, and active lifestyle
- Awareness on reducing lifestyle risk factors such as obesity and inactivity

4

RURAL HEALTH OUTREACH & COMMUNITY ENGAGEMENT

- Outreach programmes in villages and underserved communities
- Engagement with healthcare professionals, volunteers, and local stakeholders
- Health awareness in schools, community centres, and public gatherings

5

SUPPORT FOR ECONOMICALLY WEAKER COMMUNITIES

- Awareness and screening support for vulnerable and low-income groups
- Referral guidance for patients needing medical consultation or treatment
- Encouraging affordable and preventive healthcare practices

IMPLEMENTATION APPROACH

- ✓ Community health awareness campaigns and screening camps
- ✓ Collaboration with doctors, nutritionists, healthcare experts, and volunteers
- ✓ Preventive healthcare outreach in rural and underserved areas
- ✓ CSR partnerships and public health support initiatives
- ✓ Monitoring and evaluation of programme outreach and impact

EXPECTED IMPACT

- ✓ Increase awareness about diabetes prevention and healthy living
- ✓ Promote early detection and timely medical consultation
- ✓ Encourage healthier lifestyle habits among communities
- ✓ Reduce the risk of diabetes-related complications
- ✓ Improve overall community health and well-being

OUR VISION

IWF believes that awareness, prevention, and healthy living are the strongest tools to fight lifestyle diseases, and every individual deserves the opportunity to lead a healthier and more informed life.

Together, we can build healthier communities.

Join our mission and help spread awareness, promote healthy lifestyles, and prevent diabetes for a better tomorrow.

Overview

Diabetes has emerged as one of the fastest-growing lifestyle diseases in India, affecting millions of people across both urban and rural communities. Lack of awareness, unhealthy lifestyle habits, poor dietary practices, physical inactivity, stress, and delayed diagnosis have significantly increased the risk of diabetes and related health complications.

In rural and underserved areas, many individuals remain unaware of the early symptoms, preventive measures, and long-term risks associated with diabetes. Due to limited healthcare access and low health awareness, diabetes is often diagnosed at advanced stages, leading to

serious complications such as heart disease, kidney failure, vision problems, nerve damage, and other chronic conditions.

Economically weaker families frequently face:

- Lack of awareness about diabetes prevention and healthy lifestyle practices
- Limited access to regular health check-ups and blood sugar screening
- Inability to afford continuous treatment and medicines
- Poor nutritional awareness and unhealthy food habits
- Delayed diagnosis and untreated health conditions
- Increased risk of complications due to lack of monitoring and care

As a result, diabetes not only affects individual health but also places a heavy financial and emotional burden on families and communities.

Recognising this growing public health concern, Islah Welfare Foundation (ISLAH) proposes the Diabetes Prevention & Lifestyle Awareness Programme to promote awareness, preventive healthcare, early detection, and healthy lifestyle practices among rural and underserved populations.

The programme aims to educate communities about diabetes prevention and encourage healthier living to reduce the burden of lifestyle-related diseases.

Our Objective

To create awareness about diabetes prevention, promote healthy lifestyle practices, and encourage early screening and preventive healthcare among rural and economically weaker communities.

Our Approach

1. Diabetes Awareness & Health Education

- Awareness campaigns on diabetes, its causes, symptoms, and complications
- Education on preventive healthcare and healthy lifestyle habits
- Community sessions on balanced nutrition, physical activity, and stress management

2. Free Health Screening & Check-up Camps

- Blood sugar testing and diabetes screening camps
- Basic health check-ups for early identification of high-risk individuals
- Monitoring support for diabetic and pre-diabetic individuals

3. Lifestyle & Nutrition Guidance

- Guidance on healthy eating habits and balanced diet
- Promotion of physical fitness, yoga, and active lifestyle practices
- Awareness on reducing lifestyle risk factors such as obesity and inactivity

4. Rural Health Outreach & Community Engagement

- Outreach programmes in villages and underserved communities
- Engagement with healthcare professionals, volunteers, and local stakeholders
- Health awareness sessions in schools, community centres, and public gatherings

5. Support for Economically Weaker Communities

- Awareness and screening support for vulnerable and low-income groups
- Referral guidance for patients requiring medical consultation or treatment
- Encouraging affordable and preventive healthcare practices

Implementation Approach

The programme will be implemented through:

- Community health awareness campaigns and screening camps
- Collaboration with doctors, nutritionists, healthcare experts, and volunteers
- Preventive healthcare outreach in rural and underserved areas
- CSR partnerships and public health support initiatives
- Monitoring and evaluation of programme outreach and impact

Expected Impact

Through this programme, ISLAH aims to:

- Increase awareness about diabetes prevention and healthy living
- Promote early detection and timely medical consultation
- Encourage healthier lifestyle habits among communities
- Reduce the risk of diabetes-related complications
- Improve overall community health and well-being

Our Vision

ISLAH believes that awareness, prevention, and healthy living are the strongest tools to fight lifestyle diseases, and every individual deserves the opportunity to lead a healthier and more informed life.

“Promoting healthy lifestyles and preventive care—because awareness today can prevent disease tomorrow.”

ISLAH

Menstrual Health & Hygiene Support (MHHS)

MENSTRUAL HEALTH & HYGIENE SUPPORT

Supporting dignity, health, and confidence—
because no girl should be held back by menstruation.

OVERVIEW

Menstrual hygiene remains one of the most neglected yet critical health and social issues affecting adolescent girls and women, particularly in rural and underserved communities.

Due to poverty, lack of awareness, social stigma, and limited access to sanitary products, many girls and women are unable to manage menstruation safely and hygienically. Many girls are forced to miss school during menstruation, while women suffer in silence without access to basic menstrual hygiene support.

Economically weaker families often struggle with:

- Inability to afford sanitary pads and hygiene products
- Lack of awareness about menstrual health and hygiene
- Social stigma and cultural taboos surrounding menstruation
- Limited access to clean sanitation and disposal facilities
- Increased risk of infections and health complications
- School absenteeism among adolescent girls during menstrual cycles

Recognising this urgent need, Islah Welfare Foundation (IWF) proposes the Menstrual Hygiene Support Programme to promote menstrual health awareness, improve access to hygiene products, and support the dignity and well-being of adolescent girls and women from underserved communities.

The programme aims to ensure that no girl or woman suffers due to lack of awareness, affordability, or access to menstrual hygiene support.

PROGRAMME OBJECTIVE

To improve menstrual hygiene awareness and provide access to safe menstrual hygiene products and healthcare support for adolescent girls and women, especially from economically weaker and rural communities.

PROGRAMME APPROACH

1

DISTRIBUTION OF MENSTRUAL HYGIENE KITS

- Distribution of sanitary pads and hygiene kits to girls and women
- Support for economically weaker and vulnerable communities
- Ensuring access to safe and hygienic menstrual products

2

MENSTRUAL HEALTH AWARENESS & EDUCATION

- Awareness sessions on menstrual hygiene and health
- Education on safe hygiene practices and infection prevention
- Breaking myths, stigma, and misconceptions around menstruation

3

SCHOOL & COMMUNITY OUTREACH PROGRAMMES

- Menstrual hygiene awareness programmes in schools and villages
- Engagement with teachers, parents, and community leaders
- Encouraging girls' education and regular school attendance

4

WOMEN HEALTH & DIGNITY SUPPORT

- Promoting confidence, dignity, and health among adolescent girls and women
- Encouraging open discussion and positive health behaviour
- Supporting women's health through community-based initiatives

IMPLEMENTATION APPROACH

- Distribution drives in schools, rural communities, and underserved areas
- Collaboration with healthcare professionals and volunteers
- Awareness workshops and community engagement activities
- CSR partnerships and humanitarian support initiatives
- Monitoring and evaluation of outreach and impact

EXPECTED IMPACT

- Improve menstrual hygiene awareness among girls and women
- Reduce health risks and infections caused by poor hygiene practices
- Increase school attendance and participation among adolescent girls
- Break social stigma and encourage informed conversations
- Promote dignity, confidence, and well-being for women and girls

OUR VISION

IWF believes that menstrual hygiene is a basic health and dignity issue, and every girl and woman deserves access to safe hygiene support, awareness, and care.

You can be the reason for someone's dignity and confidence.
Join our mission and help girls and women live a healthy, confident, and empowered life.

Overview

Menstrual hygiene remains one of the most neglected yet critical health and social issues affecting adolescent girls and women, particularly in rural and underserved communities. Due to poverty, lack of awareness, social stigma, and limited access to sanitary products, many girls and women are unable to manage menstruation safely and hygienically.

In rural areas, menstrual health is often surrounded by silence, misinformation, and social taboos, leading to poor hygiene practices and serious health risks. Many girls are forced to miss school during menstruation, while women suffer in silence without access to basic menstrual hygiene support.

Economically weaker families often struggle with:

- Inability to afford sanitary pads and hygiene products
- Lack of awareness about menstrual health and hygiene
- Social stigma and cultural taboos surrounding menstruation
- Limited access to clean sanitation and disposal facilities
- Increased risk of infections and health complications
- School absenteeism among adolescent girls during menstrual cycles

As a result, menstrual health challenges directly impact the education, health, dignity, confidence, and well-being of girls and women.

Recognising this urgent need, Islah Welfare Foundation (ISLAH) proposes the **Menstrual Health & Hygiene Support** to promote menstrual health awareness, improve access to hygiene products, and support the dignity and well-being of adolescent girls and women from underserved communities.

The programme aims to ensure that no girl or woman suffers due to lack of awareness, affordability, or access to menstrual hygiene support.

Our Objective

To improve menstrual hygiene awareness and provide access to safe menstrual hygiene products and healthcare support for adolescent girls and women, especially from economically weaker and rural communities.

Our Approach

1. Distribution of Menstrual Hygiene Kits

- Distribution of sanitary pads and hygiene kits to girls and women
- Support for economically weaker and vulnerable communities
- Ensuring access to safe and hygienic menstrual products

2. Menstrual Health Awareness & Education

- Awareness sessions on menstrual hygiene and health
- Education on safe hygiene practices and infection prevention
- Breaking myths, stigma, and misconceptions around menstruation

3. School & Community Outreach Programmes

- Menstrual hygiene awareness programmes in schools and villages
- Engagement with teachers, parents, and community leaders
- Encouraging girls' education and regular school attendance

4. Women Health & Dignity Support

- Promoting confidence, dignity, and health among adolescent girls and women
- Encouraging open discussion and positive health behaviour
- Supporting women's health through community-based initiatives

Implementation Approach

The programme will be implemented through:

- Distribution drives in schools, rural communities, and underserved areas
- Collaboration with healthcare professionals and volunteers
- Awareness workshops and community engagement activities
- CSR partnerships and humanitarian support initiatives
- Monitoring and evaluation of outreach and impact

Expected Impact

Through this programme, ISLAH aims to:

- Improve menstrual hygiene awareness among girls and women
- Reduce health risks and infections caused by poor hygiene practices
- Increase school attendance and participation among adolescent girls
- Break social stigma and encourage informed conversations
- Promote dignity, confidence, and well-being for women and girls

Our Vision

ISLAH believes that menstrual hygiene is a basic health and dignity issue, and every girl and woman deserves access to safe hygiene support, awareness, and care.

“Supporting dignity, health, and confidence—because no girl should be held back by menstruation.”

ISLAH

Cervical Cancer Prevention & Awareness (CCPA)

CERVICAL CANCER PREVENTION AND AWARENESS

Creating awareness, encouraging prevention, and protecting women's health—because early action can save lives.

AWARE TODAY
HEALTHY TOMORROW
STRONGER TOGETHER

OVERVIEW

Cervical cancer is one of the most preventable yet life-threatening diseases affecting women, particularly in low-income and rural communities where awareness, early screening, and access to healthcare remain limited.

Social stigma, poor healthcare access, financial hardship, and lack of awareness often prevent women from seeking timely diagnosis and treatment.

Women in economically weaker communities frequently face:

- Limited access to women's healthcare services
- Lack of awareness about cervical cancer and HPV infection
- Inability to afford screening and diagnostic tests
- Delayed diagnosis due to social hesitation and fear
- Poor access to preventive healthcare and medical counselling

Recognising this urgent healthcare challenge, Islah Welfare Foundation (IWF) proposes the Cervical Cancer Prevention & Awareness Programme to promote awareness, preventive healthcare, early screening, and women's health education, especially in rural and underserved communities.

The programme aims to empower women with knowledge, encourage early detection, and reduce the burden of cervical cancer.

PROGRAMME OBJECTIVE

To improve awareness, promote preventive healthcare, and support early detection of cervical cancer among women, especially in economically weaker and rural communities.

PROGRAMME APPROACH

1

AWARENESS & HEALTH EDUCATION CAMPAIGNS

- Community awareness sessions on cervical cancer prevention
- Education about HPV infection, symptoms, risk factors, and early signs
- Promotion of regular women's health check-ups and preventive care

2

CERVICAL CANCER SCREENING SUPPORT

- Organising screening and health check-up camps for women
- Encouraging early diagnosis through medical consultation and screening
- Referral assistance for women requiring further medical evaluation

3

WOMEN'S HEALTH & HYGIENE AWARENESS

- Awareness on reproductive health, menstrual hygiene, and wellness
- Promoting healthy lifestyle practices and preventive healthcare behaviour
- Breaking myths, fear, and stigma associated with women's diseases

4

COMMUNITY OUTREACH & RURAL HEALTH ENGAGEMENT

- Outreach programmes in rural and underserved communities
- Engagement with healthcare professionals, volunteers, and women groups
- Health education through schools, community centres, and drives

5

SUPPORT FOR ECONOMICALLY WEAKER WOMEN

- Assistance and guidance for vulnerable women requiring medical support
- Connecting needy patients with healthcare institutions and support systems
- Encouraging access to affordable preventive healthcare services

IMPLEMENTATION APPROACH

- Medical awareness camps and women health outreach programmes
- Collaboration with doctors, hospitals, healthcare experts, and volunteers
- Community mobilisation and health education activities
- CSR partnerships and public health support initiatives
- Monitoring and documentation of programme outreach and impact

EXPECTED IMPACT

- Increase awareness about cervical cancer prevention and early detection
- Encourage women to undergo regular health screening
- Reduce stigma and misinformation related to women's health
- Improve access to preventive healthcare services in rural areas
- Promote healthier, informed, and empowered communities

OUR VISION

IWF believes that awareness and early prevention can save lives, and every woman deserves access to healthcare, dignity, and the opportunity to live a healthy life free from preventable diseases.

Together, we can protect women's health and save lives.

Support our Cervical Cancer Prevention & Awareness Programme and help build a healthier future for women and communities.

Overview

Cervical cancer is one of the most preventable yet life-threatening diseases affecting women, particularly in low-income and rural communities where awareness, early screening, and access to healthcare remain limited. In India, thousands of women lose their lives every year due to late diagnosis and lack of timely medical intervention.

Despite advancements in medical science, many women in rural and underserved areas remain unaware of:

- The causes and symptoms of cervical cancer
- The importance of early screening and prevention
- Availability of HPV vaccination and preventive healthcare
- Regular women's health check-ups and medical consultation

Social stigma, poor healthcare access, financial hardship, and lack of awareness often prevent women from seeking timely diagnosis and treatment.

Women in economically weaker communities frequently face:

- Limited access to women's healthcare services
- Lack of awareness about cervical cancer and HPV infection
- Inability to afford screening and diagnostic tests
- Delayed diagnosis due to social hesitation and fear
- Poor access to preventive healthcare and medical counselling

As a result, many cases are detected only at advanced stages, reducing the chances of successful treatment and survival.

Recognising this urgent healthcare challenge, Islah Welfare Foundation (ISLAH) proposes the Cervical Cancer Prevention & Awareness Programme to promote awareness, preventive healthcare, early screening, and women's health education, especially in rural and underserved communities.

The programme aims to empower women with knowledge, encourage early detection, and reduce the burden of cervical cancer through awareness and preventive action.

Programme Objective

To improve awareness, promote preventive healthcare, and support early detection of cervical cancer among women, especially in economically weaker and rural communities.

Programme Approach

1. Awareness & Health Education Campaigns

- Community awareness sessions on cervical cancer prevention
- Education about HPV infection, symptoms, risk factors, and early signs
- Promotion of regular women's health check-ups and preventive care

2. Cervical Cancer Screening Support

- Organising screening and health check-up camps for women
- Encouraging early diagnosis through medical consultation and screening support
- Referral assistance for women requiring further medical evaluation

3. Women's Health & Hygiene Awareness

- Awareness on reproductive health, menstrual hygiene, and women's wellness
- Promoting healthy lifestyle practices and preventive healthcare behaviour
- Breaking myths, fear, and stigma associated with women's diseases

4. Community Outreach & Rural Health Engagement

- Outreach programmes in rural and underserved communities
- Engagement with healthcare professionals, volunteers, and women groups
- Health education through schools, community centres, and awareness drives

5. Support for Economically Weaker Women

- Assistance and guidance for vulnerable women requiring medical support
- Connecting needy patients with healthcare institutions and support systems
- Encouraging access to affordable preventive healthcare services

Implementation Approach

The programme will be implemented through:

- Medical awareness camps and women health outreach programmes
- Collaboration with doctors, hospitals, healthcare experts, and volunteers
- Community mobilisation and health education activities
- CSR partnerships and public health support initiatives
- Monitoring and documentation of programme outreach and impact

Expected Impact

Through this programme, ISLAH aims to:

- Increase awareness about cervical cancer prevention and early detection
- Encourage women to undergo regular health screening
- Reduce stigma and misinformation related to women's health
- Improve access to preventive healthcare services in rural areas
- Promote healthier, informed, and empowered communities

Our Vision

ISLAH believes that awareness and early prevention can save lives, and every woman deserves access to healthcare, dignity, and the opportunity to live a healthy life free from preventable diseases.

“Creating awareness, encouraging prevention, and protecting women's health—because early action can save lives.”

ISLAH

Rural Healthcare & Wellness Centres (RHWC)

RURAL HEALTHCARE & WELLNESS CENTRES

Bringing healthcare closer to rural communities—
building healthier lives through accessible care,
awareness, and wellness.

Healthy Villages
Strong Communities
Brighter Futures

OVERVIEW

Access to quality healthcare remains one of the biggest challenges in rural India. Millions of people in villages face difficulties in obtaining timely medical consultation, basic treatment, preventive healthcare services, and emergency support due to inadequate infrastructure and shortage of healthcare professionals.

Many rural families travel long distances even for minor treatment, resulting in delayed care, increased expenses, and worsening health conditions, especially among women, children, the elderly, and people with chronic illnesses.

Rural communities commonly face:

- Limited availability of nearby healthcare facilities
- Shortage of doctors, nurses, and trained healthcare workers
- Lack of preventive healthcare and regular health monitoring
- Poor maternal and child healthcare support
- Limited awareness about nutrition, hygiene, and healthy living
- Financial barriers to accessing quality medical treatment
- Delayed diagnosis of diseases and chronic health conditions

Recognising this critical healthcare gap, Islah Welfare Foundation (IWF) proposes the Establishment of Rural Healthcare & Wellness Centres to provide accessible, affordable, preventive, and community-focused healthcare services in rural and underserved areas.

The initiative aims to strengthen primary healthcare systems at the grassroots level while promoting overall health, wellness, and preventive care.

PROJECT OBJECTIVE

To establish community-based Rural Healthcare & Wellness Centres that provide accessible healthcare services, preventive care, health awareness, and basic medical support to underserved rural populations.

PROJECT APPROACH

1

PRIMARY HEALTHCARE SERVICES

- Basic medical consultation and treatment support
- General health check-ups and primary care services
- Management of common illnesses and minor conditions
- Referral support for advanced medical treatment

2

PREVENTIVE HEALTHCARE & WELLNESS

- Regular health screening and preventive care programmes
- Awareness on nutrition, hygiene, sanitation, and healthy lifestyle
- Promotion of fitness, mental well-being, and disease prevention
- Monitoring of chronic conditions like diabetes and hypertension

3

WOMEN & CHILD HEALTHCARE SUPPORT

- Maternal and child healthcare awareness and support
- Menstrual hygiene and women wellness programmes
- Nutrition awareness for mothers and children
- Adolescent health and anaemia awareness initiatives

4

COMMUNITY HEALTH AWARENESS & OUTREACH

- Health awareness camps and village outreach programmes
- Education on communicable and lifestyle diseases
- Community participation and health education activities
- Awareness on vaccination, sanitation, and preventive practices

5

AFFORDABLE & ACCESSIBLE RURAL HEALTHCARE

- Low-cost or subsidised healthcare services
- Healthcare access for remote and underserved communities
- Support for economically weaker and vulnerable populations
- Community-based healthcare support mechanisms

IMPLEMENTATION PLAN

- Establishment of healthcare and wellness centres in rural areas
- Engagement of qualified healthcare professionals and community health workers
- Collaboration with hospitals, doctors, and medical institutions
- Community outreach and awareness programmes
- CSR partnerships and healthcare support initiatives
- Continuous monitoring, documentation, and impact assessment

EXPECTED IMPACT

- Improve access to primary healthcare services in rural areas
- Promote preventive healthcare and healthy lifestyle practices
- Reduce disease burden and delayed treatment cases
- Improve maternal, child, and community health outcomes
- Strengthen rural healthcare infrastructure and awareness
- Enhance overall health, dignity, and quality of life in underserved communities

OUR VISION

IWF believes that healthcare is a fundamental necessity, and every individual deserves access to affordable, timely, and quality healthcare services regardless of their socio-economic condition or geographic location.

Together, we can build healthier and stronger communities.
Support our Rural Healthcare & Wellness Centres and help bring quality healthcare to every village.

Overview

Access to quality healthcare remains one of the biggest challenges in rural India. Millions of people living in villages and underserved communities continue to face difficulties in obtaining timely medical consultation, basic treatment, preventive healthcare services, and emergency medical support due to inadequate healthcare infrastructure and a shortage of healthcare professionals.

In many rural areas, people are forced to travel long distances even for minor medical treatment, resulting in delayed care, increased expenses, and worsening health conditions. The lack of accessible and affordable healthcare services particularly affects economically weaker families, women, children, elderly individuals, and persons with chronic illnesses.

Rural communities commonly face:

- Limited availability of nearby healthcare facilities
- Shortage of doctors, nurses, and trained healthcare workers
- Lack of preventive healthcare and regular health monitoring
- Poor maternal and child healthcare support
- Limited awareness about nutrition, hygiene, and healthy living
- Financial barriers to accessing quality medical treatment
- Delayed diagnosis of diseases and chronic health conditions

As a result, many preventable illnesses become serious health problems, affecting the overall well-being, productivity, and quality of life of rural populations.

Recognising this critical healthcare gap, Islah Welfare Foundation (ISLAH) proposes the **Establishment of Rural Healthcare & Wellness Centres** to provide accessible, affordable, preventive, and community-focused healthcare services in rural and underserved areas.

The initiative aims to strengthen primary healthcare systems at the grassroots level while promoting overall health, wellness, and preventive care within communities.

Project Objective

To establish community-based Rural Healthcare & Wellness Centres that provide accessible healthcare services, preventive care, health awareness, and basic medical support to underserved rural populations.

Project Approach

1. Primary Healthcare Services

- Basic medical consultation and treatment support
- General health check-ups and primary care services
- Management of common illnesses and minor health conditions
- Referral support for advanced medical treatment when required

2. Preventive Healthcare & Wellness

- Regular health screening and preventive care programmes
- Awareness on nutrition, hygiene, sanitation, and healthy lifestyle
- Promotion of fitness, mental well-being, and disease prevention
- Monitoring of chronic conditions such as diabetes and hypertension

3. Women & Child Healthcare Support

- Maternal and child healthcare awareness and support
- Menstrual hygiene and women wellness programmes
- Nutrition awareness for mothers and children
- Adolescent health and anaemia awareness initiatives

4. Community Health Awareness & Outreach

- Health awareness camps and village outreach programmes
- Education on communicable and lifestyle diseases
- Community participation and health education activities
- Awareness regarding vaccination, sanitation, and preventive practices

5. Affordable & Accessible Rural Healthcare

- Low-cost or subsidised healthcare services for poor families

- Healthcare access for remote and underserved communities
- Support for economically weaker and vulnerable populations
- Community-based healthcare support mechanisms

Implementation Plan

The project will be implemented through:

- Establishment of healthcare and wellness centres in rural areas
- Engagement of qualified healthcare professionals and community health workers
- Collaboration with hospitals, doctors, and medical institutions
- Community outreach and awareness programmes
- CSR partnerships and healthcare support initiatives
- Continuous monitoring, documentation, and impact assessment

Expected Impact

Through this initiative, ISLAH aims to:

- Improve access to primary healthcare services in rural areas
- Promote preventive healthcare and healthy lifestyle practices
- Reduce disease burden and delayed treatment cases
- Improve maternal, child, and community health outcomes
- Strengthen rural healthcare infrastructure and awareness
- Enhance overall health, dignity, and quality of life in underserved communities

Our Vision

ISLAH believes that healthcare is a fundamental necessity, and every individual deserves access to affordable, timely, and quality healthcare services regardless of their socio-economic condition or geographic location.

“Bringing healthcare closer to rural communities—building healthier lives through accessible care, awareness, and wellness.”

ISLAH
